

TABLE OF CONTENTS

BRETFORD LIBRARY SYSTEMS

What started out as one library line has grown to five lines of library furniture.

High design meeting quality construction in Bretford's Ithaca, Elmhurst and Trinity Hall lines. Each line offers a distinct, unique style that allows them to fit perfectly in nearly any public, university, school or corporate library. Each collection includes a full spectrum of products from reading tables and carrels to lounge seating and occasional tables. Bretford's quality manufacturing knowledge and skill ensures each line will withstand years of use.

Bretford's San Francisco Circulation Desk combines the best of all things important in libraries. Developed around strict ergonomic requirements, the San Francisco Circulation Desk is a functional and ergonomically designed desk with built-in modularity. Thanks to the diligent engineering efforts and production knowledge of Bretford, creative talents of Kwan Henmi Architecture, and ergonomic prowess of Mike White Consulting, librarians now have furniture that enhances the way they work.

Legacy Library Environments is always evolving to include the latest trends in libraries. The initial design concept for Legacy was adaptability. As technology and media changes, Legacy changes too. Legacy allows shelves to be easily switched as storage needs change and collections grow. Because Legacy uses frames rather than full wood back panels, air circulation throughout the entire library is improved. In addition, Bretford's unique framing system provides full structural integrity thus not requiring tops and toe kicks for stability. This saves you space and money.

STANDARD TERMS AND CONDITIONS OF SALE

SPECIFICATIONS AND TERMS

This specification guide supercedes all previous issues. Pricing can be obtained by contacting Bretford's customer service department at 800-521-9614. Pricing terms are 1% 10 days, Net 30 days from date of invoice on approved credit. A service fee of 1.5% of the invoice balance will be charged for all late payments. *All prices quoted are Suggested List Prices and subject to change.* Cash discounts do not apply on freight charges. Legal title to products passes at the time of shipment.

Bretford, Inc. (BI) reserves the right to change prices, specifications, fabrics, dimensions, finishes, and products at any time without notice. This right also applies to adding or discontinuing products and changing catalog content.

CHANGE ORDERS

BI will make every attempt to handle any reasonable change request provided the change request is submitted to BI in writing and is received prior to the start of production. In the event a change order is received, BI reserves the right to increase prices in accordance with the costs involved in the change requested.

CANCELLATION POLICY

Orders may be cancelled only with written consent from BI. *If an order is approved for cancellation, it will be subject to an order cancellation fee of 25% of the order. Non-standard items, special finishes, or special materials cannot be cancelled after acknowledgment and acceptance. In addition, orders in production are not subject to cancellation.*

PRODUCT RETURNS

Products produced by BI to customer specification will not be accepted for return if ordered incorrectly. BI will issue Return Authorizations at its discretion for products or parts deemed defective. Merchandise received by BI without a valid Return Authorization will not be accepted by our shipping department.

CUSTOM CAPABILITIES

BI can modify our products to fit your special needs and applications. Please fax our Specials Department at 800-343-1779 to receive a quote. All quotes take three to five days and will be returned faxed with a quote number. Please refer to your quote number when placing an order.

NOTE: Custom made products can not be returned.

WARRANTIES

BI engineers and manufactures its products to provide dependable operation. Therefore, BI warrants that all products it manufactures are, at the date of shipment, free from defects in material or workmanship. Therefore, any product which under normal use fails to function within the time periods specified below and found defective in material or workmanship by the Company's inspection will be repaired or replaced without charge to the buyer or, at the election of BI, a credit will be allowed up to the invoice purchase price of the product. This warranty is inapplicable where, in the judgment of BI, the defect is attributable to abnormal wear, misapplication, abnormal use, misuse, modification or damage after shipment, including damage caused by the buyer's failure to properly maintain or other similar cause. *This warranty is expressly in lieu of any other express or implied warranties, including any other implied warranty of merchantability or fitness for ordinary or particular purpose. There are no other warranties which extend beyond the description on the face hereof.*

Bretford Furniture:

Twenty (20) years from date of shipment.

Excludes the following products which carry these warranties:

Fabric:

One (1) year from date of shipment, provided normal usage applies. Dictated by fabric manufacturer warranty and passed on accordingly.

Electrical Assemblies/Components:

One (1) year from date of shipment.

SmartDeck Gas Shock:

One (1) year from date of shipment.

All trademarks and registered trademarks are the sole property of their respective owners.

FREIGHT POLICY AND DELIVERY

All shipments are F.O.B. Origin - Pre-Pay and Add Freight - Franklin Park, IL. All shipments are "dock deliveries". An order requesting "non-dock" or "inside delivery" must be specified on the Purchase Order. There is an additional charge for this service. Charges will vary between shippers.

All pick-up orders will be held for 48 hours after notification. After 48 hours, the order will be shipped prepaid and add via the House carrier or UPS, whichever is the lowest cost to the customer.

BI will make every effort to ship in accordance with customer requested freight carriers. In the event no carrier is specified, BI will select the least costly alternative to handle customer shipments.

BI reserves the right to make partial shipments if need dictates unless otherwise instructed by the customer not to do so.

BI is not responsible for damage in shipment when product is shipped on a third party or collect basis. When product is shipped on a prepaid basis, BI responsibility ends when the carrier issues receipt indicating the merchandise has been received in good condition. In the event of freight damage, note this on the freight bill and notify the carrier at once for inspection. Note that carriers require reports of damage within 15 days. Failure to report damage or loss is the consignee's responsibility.

All merchandise will ship upon completion of production. If the buyer is unable to accept delivery of product at the time of shipment, BI reserves the right to transfer this merchandise to storage. All costs for storage will be at the customer's expense. Transfer to storage will be considered delivery for all purposes including invoicing and payment. Buyer will bear the risk of loss or damage during storage.

ENVIRONMENTAL RESPONSIBILITY

Bretford has earned GREENGUARD Certification for many of its tables, carts, and accessories used in commercial business and education facilities. Through this designation and in partnership with facilities managers, designers, architects and resellers, Bretford is helping to create healthier working and learning environments - particularly for children. By specifying or installing Bretford's GREENGUARD Certified products, institutions are closer to achieving LEED Certification, the nationally accepted benchmark towards the design, construction, and operation of green buildings. For a complete listing of GREENGUARD Certified Bretford models, please see the [GREENGUARD Online Product Guide](#).

LIBRARY PLANNING ASSISTANCE

Bretford offers assistance in planning your library. The Project Proposal Team can help you determine the product you should specify as well as layout the library providing you with a drawing for review. Please contact Bretford's Customer Service Team for a Library Planning Form.

20-20 CAP STUDIO™

20-20 CAP Studio™ is an integrated package of applications that automates the design and specification process. It contains two base applications, 20-20 CAP Designer and 20-20 Worksheet. CAP Designer is an AutoCAD®-based design tool. Worksheet is a specification tool used for product pricing, specification and estimating. 20-20 CAP Studio™ has been the industry standard for AutoCAD®-based space planning for over 25 years. 20-20 Technologies Inc. is the world's leading provider of computer-aided design, sales software and manufacturing for the interior design industry.

FINISH OPTIONS

CUSTOMER'S OWN MATERIAL TESTING REQUIREMENTS

We reserve the right to reject a fabric or leather which we deem unsuitable for the application intended. WE CAN NOT ASSUME RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF COM FABRIC. Materials must be sent for approval for upholstery use before the order is accepted.

Please register any COM or COL with Bretford through Bretford's online partner site BretfordCommons.com at www.BretfordCommons.com.

COM/COL material should be shipped, prepaid, with the COM/COL Application Form to the following address:

ITHACA, ELMHURST & TRINITY HALL LOUNGE SEATING

Bretford Library Systems
c/o Charles Alan
2901 Stanley Avenue
Fort Worth, TX 76110

LEGACY LIBRARY SEATING

Bretford Library Systems
c/o Holsag Customer Service
164 Needham Street
Lindsay, ON K9V 5R7 Canada

COM and COL material will be applied at our discretion, unless other specific instructions accompany the order. CUSTOMER MUST SPECIFY ON THE ORDER IF THE FABRIC IS TO BE MATCHED. Normally, without instructions requesting otherwise, fabric will be railroaded as shown below.

Railroaded Fabric

COL requirements are shown in square feet and are based on hides that average a minimum of 40 square feet each. Increase COL footage requirements 15% when using hides smaller than 40 square feet.

The COM pricing applies to one type of cover being used on one style of chair. There is a 5% upcharge for 2 or more fabrics. COM yardage requirements are listed above. This is based on plain 54" material. **Extra fabric is required to match any pattern with matching repeats.** For 54" material with a pattern repeat, increase the COM yardage requirements by the factor shown in the chart below. For geometric patterns or other fabrics with repeats in both directions, add the vertical and horizontal repeats and use the chart below.

<u>Fabric Repeat</u>	<u>Increase COM Requirement by</u>
5" and under	10%
6"-10"	15%
11"-15"	20%
16"-21"	25%
22"-28"	28%
29" and above	30%

For material less than 54" wide, please contact Bretford for yardage estimate.

Fire Codes:

California TB117

All Bretford standard soft seating is produced with materials that meet California TB117.

California TB133

Bretford soft seating furniture will be available in CAL133 certified models sometime around mid-2008. Call Customer Service for pricing and availability.

California TB133 - COM Fabrics

Contact Customer Service for a quotation. The customer will have to purchase one arm chair to be subjected to the burn-certification test plus a fee for the test.

FINISH OPTIONS

FINISHES FOR LIBRARY FURNITURE

Because no two facilities are alike, Bretford can make each library a completely unique entity. Bretford Library Systems can be specified in several powder paint colors, laminates, and veneers.

Visit our website at www.bretford.com to view all of our finish options. You may order a finish brochure or samples right on-line. You may also contact Bretford's Customer Service Department to receive a finish brochure or finish samples.

WOOD FINISHES

Products are available in Oak, Cherry, Maple, and Sapeli finishes as indicated. All of Bretford's finishes are carefully selected for uniformity of color and grain. Minor variations may occur due to the inherent characteristics of wood; therefore, the furniture you receive may not be a perfect match to our samples.

NON-STANDARD FINISHES

Delivery on laminates and veneers not offered in Bretford's finish options will require an extended lead time. Non-standard finishes also incur an upcharge. Contact our Project Team or Customer Service for more information.

ITHACA

The Ithaca collections can be defined as quiet, composed and orderly. This clean-lined design is sophisticated yet unadorned with a simple elegance and a sense of purpose. Ithaca's design allows for the opportunity to place this furniture almost in any setting.

- All components, from tables to seating, incorporate the use of wood and metal creating a look that compliments a variety of architectural styles.
- A variety of study options are available including carrels, workstations, study desks and computer desks.
- Kiosks create perfect walk-up patron access stations.
- Carrels and kiosks as well as all worksurfaces are available in a variety of beautiful veneers.
- Complimentary lounge furniture completes the line, once again incorporating wood and metal along with upholstery.
- Occasional tables match Ithaca's other tables and include side and coffee tables in a variety of shapes and sizes.

ITHACA SPECIFICATION INFORMATION

KIOSKS AND CARRELS

Upright Panels:

Upright panels on kiosks and carrels are constructed of 17/16" thick 45-lb. density industrial grade particle board covered on both sides with .031" thick A-grade plain sliced and book matched wood veneer. A metal frame surrounds the wood panel. This steel, tube frame is finished in environmentally friendly powder paint.

On add-on units, four-pack and six-pack units, holes are cut on the middle panels to allow for cord management.

Back panels on Carrels only (not on Kiosks) feature a reveal that runs down the length of the panel until just under the work surface. This reveal measures 1" x 3/8" and is concealed by a metal cover. This reveal, while creating a design element, also provides cord management when a light is used on the carrel.

Worksurfaces:

Worksurfaces are constructed of 17/16" thick 45-lb. density industrial grade particle board covered on one side with .031" thick A-grade plain sliced and book matched wood veneer or high-pressure laminate and the other side a backer. Two edge details are available on the worksurfaces (except on the 60 Degree Radius Carrel which is only available with a 3mm hardwood edge). The first edge detail is a hardwood waterfall edge which provides added comfort. The second edge detail is a 3mm square hardwood edge.

PLEASE NOTE:

Due to the differing heights of the 36"W and 48"W carrels, you CAN NOT use them in combination. For example, you can not order a 36"W starter unit and a 48"W add-on unit because the height of the 36"W unit is 48"H while the 48"W unit is 60"H.

Top Shelf:

All Carrels (not Kiosks) feature a top shelf. This shelf is constructed of 17/16" thick 45-lb. density industrial grade particle board covered on both sides with .031" thick A-grade plain sliced and book matched wood veneer. Measures 11" deep.

Single-Faced Kiosk:

Overall Dimensions: 36"W (starter) or 35"W (add-on) x 24"D x 56"H
Worksurface Height: 40"

Double-Faced Kiosk:

Overall Dimensions: 36"W (starter) or 35"W (add-on) x 46 1/2"D x 56"H
Worksurface Height: 40"

Four-Pack Kiosk:

Overall Dimensions: 70 1/2"W x 46 1/2"D x 56"H
Worksurface Height: 40"

Six-Pack Kiosk:

Overall Dimensions: 104 1/2"W x 46 1/2"D x 56"H
Worksurface Height: 40"

36"W Single-Faced Carrel:

Overall Dimensions: 36"W (starter) or 35"W (add-on) x 29"D x 48"H
Worksurface Height: 30"

36"W Double-Faced Carrel:

Overall Dimensions: 36"W (starter) or 35"W (add-on) x 56 1/2"D x 48"H
Worksurface Height: 30"

36"W Four-Pack Carrel:

Overall Dimensions: 70 1/2"W x 56 1/2"D x 48"H
Worksurface Height: 30"

36"W Six-Pack Carrel:

Overall Dimensions: 105"W x 56 1/2"D x 48"H
Worksurface Height: 30"

48"W Single-Faced Carrel:

Overall Dimensions: 48"W (starter) or 47"W (add-on) x 29"D x 60"H
Worksurface Height: 30"

48"W Double-Faced Carrel:

Overall Dimensions: 48"W (starter) or 47"W (add-on) x 56 1/2"D x 60"H
Worksurface Height: 30"

48"W Four-Pack Carrel:

Overall Dimensions: 94 1/2"W x 56 1/2"D x 60"H
Worksurface Height: 30"

48"W Six-Pack Carrel:

Overall Dimensions: 141"W x 56 1/2"D x 60"H
Worksurface Height: 30"

Task Light:

The task light (sold separately) can attach to the underside of the top shelf on carrels. A reveal found in the back panel of the carrel provides cord management for the light. The task light features an on/off switch and 9' cord. UL and C-UL listed.

Overall Dimensions: 22 1/4"W x 5"D x 1 1/8"H

Flip-Up Power Grommet:

The Flip-Up Power Grommet consists of two outlets and two data ports (data jacks must be purchased elsewhere). Power Grommets, by Byrne, Electrical Specialists, are available in Black or Silver.

60 Degree Radius Carrel:

The 60 Degree Radius Carrel's upright panels feature the same construction as all other carrels. The back panels, however, are radiused 60 degrees. No task lighting can be used on the top shelf of this carrel. The worksurface is only available with a 3mm edge (waterfall edge not available).

60 Degree Radius Carrel:

Overall Dimensions: 49 1/4"W (starter) or 48"W (add-on) x 31 3/4"D x 60"H
Worksurface Height: 30"

WORKSTATIONS AND TABLES

Worksurfaces:

Worksurfaces are constructed of 17/16" thick 45-lb. density industrial grade particle board covered on one side with .031" thick A-grade plain sliced and book matched wood veneer or high-pressure laminate and the other side a backer. All edges are a 3mm hardwood edge.

Bases:

Bases are constructed of metal tubing and finished using an environmentally friendly powder paint process. A steel stretcher, integrated into the base, attaches to the underside of the table worksurface to provide added durability to the top. The underside of the base features leveling inserts that accept threaded nylon levelers to allow for easy leveling. On tables, a hollow stretcher for cord management runs from the underside of the table to the floor,

Workstations are designed to be sat at on one side of the table while tables are designed to be sat at from both sides.

Workstations:

Overall Dimensions: 54"W or 78"W x 30"D x 30"H

Tables:

Overall Dimensions: 54"W, 72"W or 96"W x 48"D x 30"H

ITHACA SPECIFICATION INFORMATION

Flip-Up Power Grommet:

The Flip-Up Power Grommet consists of two outlets and two data ports (data jacks must be purchased elsewhere). Power Grommets, by Byrne, Electrical Specialists, are available in Black or Silver.

Workstations can be ordered with Power Grommets as an option. Power Grommets must be ordered at the same time as the workstation so a hole may be cut in the worksurface to accept them. 54"W worksurfaces come with one grommet placed in the center of the back side of the worksurface while 78"W workstations include two power grommets also placed at the rear of the worksurface. Cut out size 6¹/₃₂"W x 2¹⁵/₃₂"D. Cord measures 6' long.

Overall Dimensions: 7"W x 3"D x 17⁵/₈"H (when open)

Lighting:

Lighting has been designed as an option to compliment the rest of the Ithaca Design. While this is true, you may order any of the three lamp styles (Ithaca, Elmhurst, or Trinity Hall) for use with Ithaca furniture. The tamper resistant design includes a cloth shade. A metal diffuser attaches to the top and bottom of the shade to prevent tampering. UL listed.

Lights are available with two options:
1) Base with no power switch and
2) Base with power switch and power outlet. Lights with no power switch must be wired by an electrician. Lights with a power switch are corded but can also be direct wired by an electrician. Base is constructed of brushed aluminum.

Tables can be ordered with lighting. Lighting must be ordered with the tables so a hole may be cut in the worksurface to accept it. 54"W tables include one light while 72"W and 96"W tables include two.

Overall Dimensions: 15⁷/₁₆"W x 22 1¹/₂"H
Shade Dimensions: 15¹/₄"W x 8"H

READING DESKS

Reading Desks are constructed the same way a Table is constructed. It is intended that a reading desk be sat at on both sides of the worksurface.

Privacy Partition:

The only difference between a Table and Reading Desk is the addition of a partition that provides privacy from one side of the table to the other. The Privacy Partition runs down the center of the table, lengthwise, creating two sides of the table.

The Privacy Partition is constructed of 1⁷/₁₆" thick 45-lb. density industrial grade particle board and covered on both sides with .031" thick A-grade plain sliced and book matched wood veneer. The partition measures 11" high.

Overall Dimensions: 54"W, 72"W or 96"W x 48"D x 41"H
Worksurface Height: 30"

Flip-Up Power Grommet:

The Flip-Up Power Grommet can be ordered for the Reading Desks as an option. 54"W Reading Desks include two power grommets, one on either side of the partition. 72" and 96"W reading desks include four power grommets, two on either side of the partition. Power Grommets must be ordered at time of the desk so a hole may be cut in the worksurface to accept them. Cut out size 6¹/₃₂"W x 2¹⁵/₃₂"D. Cord measures 6' long.

COMPUTER DESKS

Computer Desks are constructed the same way a Workstation is constructed. It is intended that a computer desk be sat at on one side of the worksurface.

Computer Shelf:

The only difference between a Workstation and Computer Desk is the addition of a computer shelf that provides an added elevation for the placement of a computer monitor. The computer shelf runs along the back side of the worksurface. Underneath the computer shelf is a partition that separates the space.

The Computer Shelf is constructed of 45-lb. density industrial grade particle board and covered on all sides with .031" thick A-grade plain sliced and book matched wood veneer. The end caps of the computer shelf have holes cut in them for easy cord management. The shelf measures 7" high.

Overall Dimensions: 54"W or 78"W x 30"D x 37"H
Worksurface Height: 30"

Flip-Up Power Grommet:

The Flip-Up Power Grommet can be ordered for the Computer Desks as an option. When ordered, all Computer Desks, regardless of size, include two power grommets. Power Grommets must be ordered at time of the desk so a hole may be cut in the worksurface to accept them. Cut out size 6¹/₃₂"W x 2¹⁵/₃₂"D. Cord measures 6' long.

STUDY DESKS

Study Desks are constructed the same way a Table is constructed. It is intended that a Study Desk be sat at on both sides of the worksurface.

Study Divider:

The only difference between a Table and Study Desk is the addition of a divider that divides the table worksurface into four quadrants.

The Study Divider is constructed of 1⁷/₁₆" thick 45-lb. density industrial grade particle board and covered on both sides with .031" thick A-grade plain sliced and book matched wood veneer. The divider measures 16" high. Divider divides the work surface into four sections, and also includes side panels creating a "carrel" desk.

Overall Dimensions: 72"W x 48"D x 46"H
Worksurface Height: 30"

Flip-Up Power Grommet:

The Flip-Up Power Grommet can be ordered for the Study Desks as an option. The Study Desk includes four power grommets, one in each quadrant of the desk. Power Grommets must be ordered at time of the desk so holes may be cut in the worksurface to accept them. Cut out size 6¹/₃₂"W x 2¹⁵/₃₂"D. Cord measures 6' long.

Lighting:

This lighting features identical specifications as the lighting available for Tables.

Study Desks can be ordered with one light. The Study Desk can only use the lamp with no switch. The light is placed in the center of the Study Divider.

LIBRARY SEATING

Library seating is constructed of an engineered ply-wood seat and back. Available with a two-position base and a four leg base. Each style comes with or without arms.

Chair Dimensions: Seat height: 18", Arm height: 25"

LOUNGE SEATING

All lounge seating has a similar construction with metal legs, a wood shell, and fabric seats and arms.

Wood Shell:

The wood shell is constructed of a MDF core covered with veneer. A 3mm hardwood edge is on the top and front planes for edge protection. The back corner joints are splined miters that have a poplar cleat to increase the glue surface area and to allow for mechanical fasteners (brads and or screws) to be applied from the inside of the joint.

Upholstered frame components consist of both 1¹/₈" and 3³/₄" engineered plywood incorporating double dowel construction and glue blocks to reinforce critical joints.

Metal Base:

A tubular steel base is fabricated from 16-gauge x 1¹/₂" square tubing. It is covered in environmentally safe powder paint. The tubing ends receive leveling inserts that accompany threaded nylon levelers to allow for easy leveling.

Upholstery:

The tailored cushion on all lounge seating consists of a 4" seat. The lounge chair, settee and sofa also consist of a 2" foam back. These pieces are made from combustion modified (Cal. 117) FPF (flexible polyurethane foam) with a density of 1.45 and IFD (indentation force deflection ratio) of 33-39 with a .75 oz bonded polyester fiber wrap to ensure durability while adding crown. In both the seat and the back, 2" elastic webbing is cross woven in a 5 x 5 pattern that is stretched and attached to the frame with steel staples. FLW (flock loose webbing) sheeting is placed on the webbing to insulate the foam from the webbing. Arm tops consist of one layer 1¹/₄" 65 IFD and a second layer of 1¹/₂" FPF with a 36 IFD followed by a .6 oz layer of bonded polyester fiber wrap. The inside arm has Propex sheeting that is stretched and stapled over the frame member followed by 1¹/₄" 65 ILD foam with a .75 oz bonded polyester fiber wrap.

For COM and COL yardage requirements see page 4.

Lounge Chair:

Overall Dimensions: 34"W x 29¹/₂"D x 33"H
Seat Height: 16"
Arm Height: 24"
Arm Width: 5¹/₄"

Settee:

Overall Dimensions: 57¹/₂"W x 29¹/₂"D x 33"H
Seat Height: 16"
Arm Height: 24"
Arm Width: 5¹/₄"

Sofa:

Overall Dimensions: 86¹/₄"W x 29¹/₂"D x 33"H
Seat Height: 16"
Arm Height: 24"
Arm Width: 5¹/₄"

Single Bench:

Overall Dimensions: 36"W x 24"D x 25"H
Seat Height: 19"
Arm Height: 24"
Arm Width: 4¹/₄"

Double Bench:

Overall Dimensions: 60"W x 24"D x 25"H
Seat Height: 19"
Arm Height: 24"
Arm Width: 4¹/₄"

Triple Bench:

Overall Dimensions: 84"W x 24"D x 25"H
Seat Height: 19"
Arm Height: 24"
Arm Width: 4¹/₄"

Tablet Arms:

The Tablet Arms are made from solid hard maple. The top is secured to a steel armature imbedded in the chair arm. It will rotate 360 degrees. The armature is 1⁵/₈" heavy steel tube to which the 1¹/₈" top plate is welded.

OCCASIONAL TABLES

Table Top and Sides:

The occasional table tops and sides are constructed of MDF finished on both sides with veneer. All joints of the shell (consisting of the top and sides) are a splined miter construction. The front and back faces are edge banded with plain sliced 10-mil resin impregnated paper-backed veneer that is applied with the grain running vertically.

Metal Base:

All occasional tables are constructed using a metal base on which the table top and sides are attached. The metal base is constructed of a 16-gauge x 1" square tube. It is finished in environmentally safe powder paint. The tubing ends receive leveling inserts that accompany threaded nylon levelers to allow for on site leveling.

Small Side Table Open:

Overall Dimensions: 18"W x 18"D x 22"H

Medium Side Table Open:

Overall Dimensions: 18"W x 26"D x 22"H

Large Side Table Open:

Overall Dimensions: 22"W x 22"D x 22"H

Small Coffee Table Open:

Overall Dimensions: 24"W x 42"D x 17"H

Large Coffee Table Open:

Overall Dimensions: 36"W x 36"D x 17"H

TIP: The Ithaca Collection is available in a variety of veneer finishes, paint colors and laminates. (see page 4 for options).

ITHACA KIOSKS

KIOSK SIX-PACK

IHK10546K6-__	104 1/2"W x 46 1/2"D x 56"H, 6-Pack	40"
---------------	-------------------------------------	-----

When ordering Kiosks, you may decide if you would like a flip-up power grommet as an option to provide power to the worksurface. If you choose to order a power unit, you must decide if you would like it to be black or silver.

While the flip-up power unit can be ordered separately, it is recommended you order it at the time you order your kiosk so that Bretford can cut a hole in the worksurface to accept it.

In addition, you may choose a laminate or veneer worksurface. When ordering a laminate worksurface, include the three digit ordering code for your laminate choice. When ordering a veneer worksurface, use the code "VEN" and the 3 digit veneer ordering code.

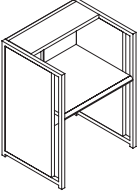

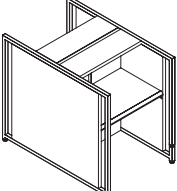

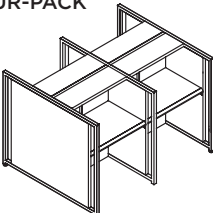

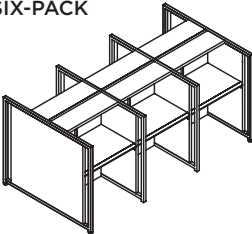

With both a laminate and veneer worksurface, you may choose a 3mm hardwood edge or a hardwood waterfall edge for your worksurface. Choose the appropriate edge detail code when ordering.

HOW TO ORDER KIOSKS:

Example: Kiosk Six-Pack; Aluminum Paint; Veneer Worksurface; Natural Maple Veneer; Waterfall Edge; No Power

TASK LIGHT			
	IETTASLKT	Task Light	

PLEASE NOTE:

Due to the differing heights of the 36"W and 48"W carrels, you CAN NOT use them in combination.

When ordering Carrels, you may decide if you would like a flip-up power grommet as an option to provide power to the worksurface. If you choose to order a power unit, you must decide if you would like it to be black or silver.

While the flip-up power unit can be ordered separately, it is recommended you order it at the time you order your carrel so that Bretford can cut a hole in the worksurface to accept it.

Task lighting is sold separately. The top shelf of the carrel, however, is manufactured to accept the light. The reveal cut in the back panel of the carrel is a design feature as well as provides cord management for the light.

In addition, you may choose a laminate or veneer worksurface. When ordering a laminate worksurface, include the three digit ordering code for your laminate choice. When ordering a veneer worksurface, use the code "VEN" and the 3 digit veneer ordering code.

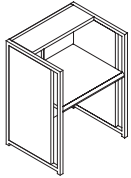

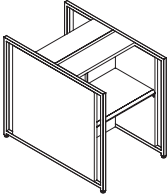

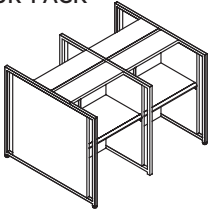

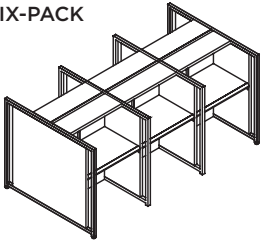

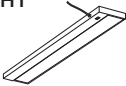

With both a laminate and veneer worksurface, you may choose a 3mm hardwood edge or a hardwood waterfall edge for your worksurface. Choose the appropriate edge detail code when ordering.

SAN FRANCISCO CIRCULATION DESK

The San Francisco Collection. A new line born of an ergonomic solution.

Bretford's newest addition, the San Francisco Collection, is a functional and ergonomically designed line of library furniture that includes circulation desks, processing areas, and reference desks. The San Francisco Public Library commissioned Kwan Henmi Architecture of San Francisco to create Interior Design Standards that would respond to their functional and aesthetic needs. In addition, Michael J. White, board certified ergonomist and independent consultant, was retained to analyze their librarians' work areas and establish standards for use in designing the most ergonomic library furniture available.

Kwan Henmi and Mike White Consulting collaborated with Bretford to respond to the library's needs resulting in The San Francisco Collection. Thanks to the diligent engineering efforts and production knowledge of Bretford and creative talents of Kwan Henmi and Mike White, San Francisco librarians now have furniture that enhances the way they work.

Bretford proudly offers the San Francisco Library furniture as standard product, available to all customers.

GENERAL ERGONOMIC CONSIDERATIONS

Workshops, interviews and research went into the development of the San Francisco Collection. The collaboration between Mike White Consulting, Kwan Henmi Architecture and Bretford involved in the development of this line has created a unique and exciting system of modular components to allow customization for each library. It is the intention of the collective design team involved with the development of the San Francisco Collection to inspire the highest quality of design execution and we hope you enjoy the flexibility offered.

The following ergonomics and workflow improvements, as determined by Mike White, are integrated to support the fit and function of the library staff with their environment. The ergonomic considerations are used to enhance the comfort and efficiency of the staff and to reduce the likelihood of developing a work-related injury. These guidelines were developed in concert with SFPL library administration and branch staff through a series of workshops to identify problems, generate ideas and test ergonomic concepts. The development process also entailed a review of ergonomics best practices and design interventions of dozens of other Library branch systems to determine which had the most influence in reducing ergonomics risk factors and producing desirable posture / motion outcomes. Additionally, the product design takes into account consideration of adopting radio frequency identification (RFID) technologies in the future and the service modules have been designed to address this new technology. For this reason, a fairly conservative approach to ergonomics is proposed to facilitate future change with minimal obsolescence of furniture, fixtures and new electronic equipment, recognizing the ergonomics advantages RFID technology will bring in the near future.

• Enhance Reach to All Materials

Anthropometric measurements for a person's functional reach are applied to all horizontal surfaces, vertical storage and staging components. Particular attention is placed on all service counters to ensure that the surface designs allow the staff to reach books, materials and their equipment without posing awkward spine or upper limb postures. A motion arc of 21" about the shoulders is used to determine most counter dimensions / configurations, to optimize people's postures, their motion efficiency and the overall performance within a branch environment with potential space limitations.

• Maximize the Staff's Ability to Slide Materials

The library staff often handles thousands of books and media over the day in what is called a "pinch-grip", that is, they lift materials using the two long fingers and the opposing force of the thumb. This posture is very stressful on the muscle / tendon structures of the hand and when performed repetitively, it can pose a risk for developing hand / wrist disorders. This furniture line utilizes the functional reach metrics mentioned above to allow the staff to rake and slide materials on counters with an open hand to reduce the need to grip items. Bins, carts and counters were also designed to enable people to transfer materials between them by sliding loads placed at similar heights. The counter finish materials were selected to minimize friction to enhance sliding of books and media.

• Accommodate People's Sizes at All Service Points

Anthropometric benchmarks were applied to determine appropriate height settings for service counters. These include elbow heights for sitting, standing and perching positions to accommodate the greatest range of staff sizes working in these postures. Circulation counters have varied-height counters at 34" and 39" to accommodate the general public and ADA. However, these counters can be utilized by staff for a very small female standing at the 34" counter or a large male perching on a stool at this height. In all staff and service areas we attempted to minimize the use of keyboard trays for height adjustment because of the difficulty they create in reaching items on the primary surface.

• Minimize Bending and Lifting to Process Materials

Bending to low book shelves, low tiers on carts, low counters or book bins placed on the floor are arguably one of the most common ergonomics complaints of the library staff. Therefore, all shelving and booktrucks are at such a height that materials can be placed at shin height (10 to 12" up) and above for all components that are frequently used by the staff. In all cases, bins, carts, trucks and counters were selected based on their ability to provide vertical assistance to the operator to minimize bending and lifting.

ERGONOMIC GUIDELINES

CIRCULATION COUNTER HEIGHTS

The Circulation counter is fixed at 39" high which is about the standing elbow height of the 50th percentile, or average height, female/male. At this height the greatest segment of the library staff can handle books and use equipment on the counter with neutral back and upper limb postures. To accommodate ADA and children's access on the public side of the counter, a lower height Circulation Module is needed. This standard provides a 34" high lower counter that will allow smaller staff to work in a standing position or anyone of the staff to sit on a stool to work in a "perching" position. For counter work that involves interacting with the public and handling materials, a standing or perching work height is desirable for enhancing a person's ability to reach and maneuver in neutral body positions.

Special Note:

If smaller branches do not include workstations for the Circulation staff to perform computer and paper work, or, if the staff must spend greater than 2-hour intervals at the counter, consider applying multiple ADA Circulation Modules to allow the staff to perch on stools rather than stand for long periods.

CIRCULATION COUNTER DESIGNS

The layout of 54"W Circulation Counter Module is 30" deep by 54" wide with a curved "body-pocket" recess at the point of operation of the staff. The depth of the counter at the body-pocket is 21" which is the average reach of the 50% female / male without bending the back or extending the shoulder. The metrics of this design provides ample surface space for equipment and books at each side of the person while allowing them to reach tools and materials placed anywhere on the counter comfortably and efficiently.

Circulation Module Work Surface Layout

- 50% female/male reach metric at 21" from body-pocket
- Ample surface space at each side for staging materials

CIRCULATION DESK COMPONENTS

The San Francisco Collection's flagship is the circulation desk. It's beautiful lines and graceful shape are the perfect center piece for any library.

- The circulation desk has a custom millwork look but is actually a modular system allowing the components to be combined together to create a custom desk.
- Worksurface heights are available in standing and perching which are desirable for enhancing a person's ability to reach and maneuver in neutral body positions.
- The worksurface is available with laminate on MDF in a variety of color options.
- Front panels, end and middle panels and interior components can be finished in any one of Bretford's veneer finishes.
- A variety of internal components can be ordered including shelves, cabinets and file drawers.
- Floor levelers on all pieces adjust to accommodate uneven floors.

SPECIFICATION INFORMATION

CIRCULATION COMPONENTS

Overall height of circulation desks are either 34" or 39". End, Middle and Front panels all measure 1" lower than the overall height to accommodate for the worksurface. The combined height of the panels and worksurfaces equals the overall height listed above.

Worksurface:

Worksurface is available with laminate on MDF. Laminate on MDF worksurface is constructed of 1/8" thick MDF with a laminate surface laid up on it. The edges of the MDF are left exposed. The edges are finished to match the end panels and front panels giving a continuous look. The staff side of the worksurface has a knife edge while all other edges have a 3mm round over edge.

Worksurfaces measure 30"D.

When ordering worksurfaces, many things need to be considered. The first is the shape of the desk. The front edge can be straight or feature a 30' or 50' radius.

The second is the size. Worksurfaces come in 3 different widths: 36", 48" or 54".

54"W worksurfaces can be ordered with a body pocket. A body pocket is a cut out on the staff side of the worksurface. The body pocket allows for the staff member to easily reach across the desk keeping all portions of the desk within reach.

Third, worksurfaces can be ordered with or without grommets. Grommets measure 2 1/4" in diameter. When ordering your worksurface, specify where the grommet should be located from the staff's perspective - left, right, both or none. Grommets are painted black and do not come with a cover.

End and Middle Panels:

End and Middle Panels are constructed of 1" thick particle board covered on both sides with veneer. End panels can be ordered with or without reveals. Reveals are a 1/4" x 1/4" groove finished with plastic inserts which are installed flush with the surface. End and Middle Panels are available in two heights: Perching (32 1/2"H) and Standing (37 1/2"H).

End Panels and Middle Panels include a metal toe kick as well. The toe kick measures 4"H and attaches to the inside of the end panel and on both sides of the middle panel. The toe kick is the structural integrity of the entire desk. It is constructed of 14-gauge steel finished in powder paint. The toe kicks include leveling glides allowing the entire desk to be leveled from the top while the desk is being installed.

Transition panels are available to allow for the desk to change in elevation. One half of the transition panel accommodates a 39"H worksurface. The other half of the panel includes a 1/4" groove through half the panel allowing for a 34"H worksurface to be inserted. The transition panels are constructed the same way as the middle panel.

All connections from toe kick to end and middle panel are metal to metal.

Overall Dimensions: 27 5/8"D x 1"W x 32 1/2"H or 37 1/2"H

Front Panels:

Front Panels are available in three different styles: 1) Straight, 2) 30' Radius and 3) 50' Radius.

The Straight Front Panels are constructed of 1" thick particle board finished on both sides with veneer. 30' and 50' Radius Front Panels have a balanced construction of 5 layers of bendable plywood finished on both side with veneer. Front Panels can be ordered with or without reveals. Reveals are a 1/4" x 1/4" plastic inserts which are installed flush with the surface. Front Panels are available in two heights: Perching (32 1/2"H) and Standing (37 1/2"H) and three widths: 36"W, 48"W and 54"W. Please be sure to order the front panel that matches the length and shape of the worksurface.

Front Panels also include a toe kick which attaches to the inside of the front panels. The toe kick is constructed of metal and finished in powder paint. The toe kick is recessed 1" on the front panels. The Front Panels attach directly to the End and Middle Panels using metal to metal connections.

Overall Dimensions: 36", 48" or 54"W x 1"D x 32 1/2"H or 37 1/2"H

Corner Units:

Corner Units are constructed of the same materials as the worksurface and front panels. Each corner unit consists of a worksurface and front panel. Front panels come with or without reveals. Corner units are designed such that a narrow shelving shell can fit underneath it. There are several different shapes and sizes to choose from. Units are available in both straight and curved forms.

CIRCULATION INTERNAL COMPONENTS AND ACCESSORIES

Shelf Shell:

The Shelf Shell sides, top and bottom are constructed of 5/8" thick particle board covered on both sides with veneer. The back of the shell is constructed of 18-gauge metal finished in powder paint. The back panel includes several cut outs to allow for cord management.

The Shell stands 4" above the floor on two, 4"H supports. The supports are constructed of 1" square tube bent and welded into a U-shape and topped with a metal plate. The metal supports are finished in powder paint. The metal plate then attaches to the underside of the shelf shell. The metal supports have glides which allow the shell to be easily leveled.

The Shelf Shell can be outfitted with a variety of different shelves and drawers. The interior of the shell has adjustment holes drilled on 32mm centers. This is how all internal components attach to the inside of the shell. The Shell comes in two heights, 33" and 38", and two widths, narrow (11 13/16") and wide (17 13/16"). The narrow shell is designed specifically to be used with the body pocket so that it does not inhibit the use of the body pocket.

The Shelf Shell is independent of the circulation desk. It is not attached to the desk so that it can be easily moved if necessary.

Wide Shelf Shell:

Overall Dimensions: 17 3/16"W x 23 1/4"D x 32 1/2" H or 37 1/2"H
Interior Dimensions: 15 7/8"W x 23 1/4"D x 25 3/4"H or 30 3/4"H

Narrow Shelf Shell:

Overall Dimensions: 11 13/16"W x 23 1/4"D x 32 1/2" H or 37 1/2"H
Interior Dimensions: 10 1/2"W x 23 1/4"D x 25 3/4"H or 30 3/4"H

SPECIFICATION INFORMATION

Drawer and File Drawer:

The Drawer and File Drawer fit in to the Shelf Shell. The Drawer and File Drawer are constructed of metal and finished with a wood veneer front. The metal portion of the drawer is constructed of 18-gauge steel and finished with powder paint. The front of the drawer is $\frac{5}{8}$ " thick particle board covered on both sides with veneer. Drawer pulls are arc shaped and are finished to match the metal portion of the drawers. The Drawer is shallow while the File Drawer is deeper allowing for the use of hanging file folders for storing $8\frac{1}{2}$ " x 11" paper. The drawers slide easily on Accuride Glides.

It is recommended that the File Drawer only be installed at the very bottom of the Shelf Shell to prevent tipping.

Wide Drawer:

Overall Dimensions: $15\frac{3}{4}$ "W x $22\frac{1}{4}$ "D x $4\frac{15}{16}$ "H

Narrow Drawer:

Overall Dimensions: $10\frac{3}{8}$ "W x $22\frac{1}{4}$ "D x $4\frac{15}{16}$ "H

Wide File Drawer:

Overall Dimensions: $15\frac{3}{4}$ "W x $22\frac{1}{2}$ "D x $10\frac{1}{8}$ "H

Narrow File Drawer:

Overall Dimensions: $10\frac{3}{8}$ "W x $22\frac{1}{2}$ "D x $10\frac{1}{8}$ "H

Metal Adjustable Shelf:

The Metal Adjustable Shelf fits perfectly into the Shelf Shell using collared pins. The shelf is finished in powder paint to resist chipping and scratching. The shelf can be placed anywhere inside the shell and can be moved whenever necessary. The Metal Shelf is available to fit both the wide and narrow Shelf Shell.

Wide Metal Adjustable Shelf:

Overall Dimensions: $15\frac{3}{4}$ "W x $22\frac{1}{4}$ "D x $1\frac{3}{8}$ "H

Narrow Metal Adjustable Shelf:

Overall Dimensions: $10\frac{3}{8}$ "W x $22\frac{1}{4}$ "D x $1\frac{3}{8}$ "H

Wood Adjustable Shelf:

The Wood Adjustable Shelf is constructed of 1" thick particle board covered on both sides with veneer. The Wood Adjustable Shelf is easily installed inside the Shelf Shell. It is installed using collared pins and can readily be rearranged if necessary. The Wood Shelf is available to fit both the wide and narrow Shelf Shell.

Wide Wood Adjustable Shelf:

Overall Dimensions: $15\frac{3}{4}$ "W x $22\frac{1}{4}$ "D x 1"H

Narrow Wood Adjustable Shelf:

Overall Dimensions: $10\frac{3}{8}$ "W x $22\frac{1}{4}$ "D x $1\frac{3}{8}$ "H

Metal Pull-Out Shelf:

The Pull-Out Shelf is constructed of metal and attaches directly to the Shelf Shell. The shelf is available to fit both the wide and narrow Shelf Shell.

Wide Metal Pull-Out Shelf:

Overall Dimensions: $15\frac{3}{4}$ "W x $22\frac{1}{4}$ "D x 1"H

Narrow Metal Pull-Out Shelf:

Overall Dimensions: $10\frac{3}{8}$ "W x $22\frac{1}{4}$ "D x $1\frac{3}{8}$ "H

Worksurface Mounted CPU Holder:

The Worksurface Mounted CPU holder is constructed of metal and finished with powder paint to resist scratching and chipping. It attaches to the worksurface using wood screws. The CPU Holder is adjustable from $4\frac{1}{2}$ " to $11\frac{1}{4}$ " wide. The maximum CPU height is $18\frac{7}{8}$ ".

Modesty Panel Mounted CPU Holder:

The Modesty Panel Mounted CPU Holder attaches directly to the Modesty Panel. This type of installation is recommended when it is not necessary to constantly reach the CPU. The Holder is constructed of a $\frac{5}{8}$ " thick wood platform finished on both sides and welded metal brackets finished in powder paint.

Overall Dimensions: 22"W x 12"D

Worksurface Screen:

The Worksurface Screen was designed to hide cords and wires from the back of a computer monitor. It attaches directly to the worksurface. The Worksurface Screen is constructed of metal finished in powder paint. Two 14-gauge steel panels are attached back to back with a $\frac{1}{2}$ " separation between them. They are attached to the worksurface using bolts that come through the bottom of the worksurface. Worksurface is pre-drilled to allow for the screen to attach at any time. The metal panels are perforated with $\frac{1}{2}$ " square cut outs.

Overall Dimensions: 18"W x 15"H

Flat Screen Monitor Arm:

The Flat Screen Monitor Arm supports one flat monitor. It conforms to VESA 75mm and 100mm mounting patterns.

Arm mounts to the work surface with one bolt (provided). One small hole must be drilled into the work surface. It can be installed anywhere on the worksurface. It is constructed of extruded aluminum finished only in silver.

The Flat Screen Monitor Arm utilizes a universal mounting bracket that holds the flat panel to the arm. Most flat panels will fit, but contact your screen manufacturer for more information on your specific flat screen model. The maximum weight capacity is 25 pounds per flat screen monitor.

The arm features a single motion, 5-axis point position adjustment. The height adjustment is 14" (+7" to -7"). The arm extension is 22" with an arm rotation of 359 degrees. The bracket arm rotation when a monitor is mounted is 230 degrees. The monitor swivel is 359 degrees and monitor tilt is 180 degrees. The folded depth is 4".

Disposal Cabinet Door:

The Disposal Cabinet works with the Wide or Narrow Shelf Shell for use with 34"H or 39"H Circulation Desks. Use this cabinet door to hide the garbage. The cut out in the door allows you to throw items away easily and keeps it hidden. The door is constructed of $\frac{5}{8}$ " thick particle board covered on both sides with veneer or MDF covered on both sides with laminate. Includes a matching handle that is painted the same color as the supports of the Shelf Shell. The Disposal Cabinet Door can be ordered with or without a lock.

Wide Disposal Cabinet Door:

Overall Dimensions: 15³/₄"W x 5⁵/₈"D x 25⁵/₈"H or 30⁵/₈"H

Narrow Disposal Cabinet Door:

Overall Dimensions: 10³/₈"W x 5⁵/₈"D x 25⁵/₈"H or 30⁵/₈"H

Cabinet Door:

The Cabinet Door works with the Wide or Narrow Shelf Shell for use with 34"H or 39"H Circulation Desks. Use this cabinet door to create an enclosed storage space. The door is constructed of 5/8" thick particle board covered on both sides with veneer or MDF covered on both sides with laminate. Includes a matching handle that is painted the same color as the supports of the Shelf Shell. The Cabinet Door can be ordered with or without a lock.

Wide Cabinet Door:

Overall Dimensions: 15³/₄"W x 5⁵/₈"D x 25⁵/₈"H or 30⁵/₈"H

Narrow Disposal Cabinet:

Overall Dimensions: 10³/₈"W x 5⁵/₈"D x 25⁵/₈"H or 30⁵/₈"H

Worksurface Mounted Pull-Out Shelf:

The Worksurface Mounted Pull-Out Shelf is the perfect way to add additional worksurface without adding and entire shelving shell. The Pull-Out Shelf is constructed of metal and particle board. The assembly is metal and attaches directly to underside of the worksurface. The Pull-Out Shelf portion is constructed of particle board covered on both sides with laminate.

Overall Dimensions: 9³/₄"W x 16¹/₈"D x 4¹³/₁₆"H

Worksurface Mounted Pencil Drawer:

The Worksurface Mounted Pencil Drawer is constructed of metal and finished with a wood veneer front. The metal portion of the drawer is constructed of 18-gauge steel and finished with powder paint. The front of the drawer is 5/8" thick particle board covered on both sides with veneer. Drawer pulls are arc shaped and are finished to match the metal portion of the drawers.

Overall Dimensions: 9³/₄"W x 16¹/₈"D x 4¹³/₁₆"H

HARDWIRE SYSTEM

Bretford's 8-wire, 4-circuit hardwire system must be installed by a licensed electrician. All components are UL Listed and manufactured in accordance with National Electric Code requirements.

Power System:

Each Power System consists of a metal housing which attaches to the front panel. Enclosed in each housing is a power harness which distributes electrical power to the receptacles. 36"W units include one power system housing. 48"W and 54"W units include two power systems and an appropriate length jumper to connect the two.

Data Attachment:

The Data Attachment attaches to the bottom of the Power System. It provides four cut-outs to accept data jacks. Data jacks are sold separately.

Duplex Receptacles:

Bretford's 8-wire, 4-circuit system uses Duplex receptacles (each duplex has two electrical outlets) to determine from which circuit the electrical equipment will draw power. The receptacles are marked 1, 2, 3 or 4 to designate the circuit that is activated when it is installed into the Power System. Each circuit has 20 amp capability. Circuits 1, 2 and 3 all share a common ground while circuit 4 has a separate ground and a neutral wire. This makes Circuit 4 perfect for more sensitive equipment like printers and network servers. Typically, personal computers and displays are connected to circuits 1, 2 or 3. Specify two duplex receptacles for every one Power System.

Simplex Receptacles:

Any Duplex Receptacle can be replaced with a surge protected simplex. The simplex is the only outlet that is surge protected on the circuit.

Power Feed:

12'L cable with metal chase housing provides a safe and attractive way to bring power from the floor to the wire power system. Includes a 12'L 8-wire, 4-circuit cable and one leg chase. Power feed must be installed by a licensed electrician. Finished in powder paint.

Power Jumper:

Connects Power Systems from table to table. Available in a variety of sizes to best match the desk sizes being placed next to each other.

Fabric Cable Wrap:

The Fabric Cable Wrap measures 7" wide x 6' long. One edge of the fabric has velcro sewn on to allow for easy attachment. Cords, cables and power jumpers can be easily wrapped for simple cord management.

SOFTWARE SYSTEM**Softwire Power System:**

The Soft-Wire Power System consists of a metal housing which attaches to the front panel. Inside the metal housing is a four-outlet surge protected power strip with one circuit capability and 20' electrical cord. Unit has an on/off switch for single-switch control. UL Listed. For safe operation, power strip can wire individual circulation desk sections but cannot be linked section-to-section.

Data Attachment:

The Data Attachment attaches to the bottom of the Softwire Power System. It provides four cut-outs to accept data jacks. Data jacks are sold separately.

Fabric Cable Wrap:

The Fabric Cable Wrap measures 7" wide x 6' long. One edge of the fabric has velcro sewn on to allow for easy attachment. Cords and cables can be easily wrapped for simple cord management.

Metal Chase:

The Metal Chase attaches to the inside panel of the circulation desk upright panel. Two sections inside the leg chase keep power and data cables separated to deter any electro-magnetic interference. Finished in durable powder paint. Use with a softwire power option.

TIP: The San Francisco Collection is available in a variety of veneer finishes, paint colors and laminates. (see page 7 for options).

How To ORDER CIRCULATION DESKS

ORDERING CIRCULATION DESKS

The San Francisco Collection Circulation Desk is a modular desk system. This design feature requires the desk to be ordered as individual components in a build-you-own manner. There are a couple of decisions that need to be made before actually ordering the unit. Those decisions as well as the step-by-step guide on how to order is outlined below.

STEP 1: DETERMINE SIZE & SHAPE

The first step is to determine how large you would like your desk to be. Since the desk components only come in 3 widths (36", 48", 54"), you will need to use a combination of sizes to fit the space you have available.

You then need to determine the shape of the desk using the three shapes available: 30' radius, 50' radius and straight. These shapes can be mixed and matched to create the shape you desire.

STEP 2: DETERMINE ELEVATION

The second step is to determine the elevation of the desk. There are two heights available: 34" and 39". You may interchange these heights throughout your entire desk.

STEP 3: ORDER END AND MIDDLE PANELS

Now it is time to write the order. The end and middle panels are the first items to order. For each entire circulation desk, there will only be two end panels: a left end panel (**P1**) and a right end panel (**P2**). When ordering the circulation desk, order from the staff view as shown above.

When ordering end panels, you must also decide if you want reveals or not. It is at this time that you would specify reveals as well as when ordering front panels.

Ordering middle panels is just as simple. Order a standard middle panel (**P3**) based on the height of the desk or a transition panel (**P4**) if the desk is shifting from one height to another.

STEP 4: ORDER FRONT PANELS

Ordering front panels is the time you begin creating the shape and size of your circulation desk. Front panels are available in three widths: 36" (**F1**), 48" (**F2**) and 54" (**F3**). They are also available in three shapes: 30' radius, 50' radius and straight. Each of these items need to be kept in mind when ordering front panels. If you have decided to have reveals on your desk and have ordered them with your end panels, you will need to order them with your front panels as well so the entire unit matches.

In addition, the height of the front panels should be the same as its neighboring end and middle panels.

STEP 5: ORDER WORKSURFACES

To complete your circulation desk, you must order your worksurfaces. Each worksurface has ultimately been decided for you based on the front panels you selected. The same considerations need to be made for worksurfaces as front panels including the width and shape.

Just like the front panels, worksurfaces come in three widths: 36", 48" and 54". Please note, only the 54"W unit can be ordered with a body pocket (**W1**). In addition, they come in three shapes: 30' radius, 50' radius and straight.

The most critical aspect to remember when ordering worksurfaces is each worksurfaces' relationship to the overall circulation desk. Because the relationship is crucial to the desk fitting together properly, there are four different ways each worksurface can be ordered to accomplish creating the desk you want. The four types

of worksurfaces are left extension, right extension, both side extension and same height both sides. These descriptions relate to how the worksurface is placed on the end and middle panels.

- When a worksurface sits alone (not touching another worksurface), it has both sides extended over the full thickness of the panels and therefore is a "Both Side Extension" worksurface (**W1**).
- When a worksurface butts up to another worksurface, requiring them to share a middle panel, or the worksurface meets up with the lower side of a transition panel, there is no extension on either side of the worksurface and therefore is a "No Side Extension" worksurface (**W2**).
- When a worksurface butts up against another worksurface on one side, thus sharing a middle panel, and extends out over the entire thickness of the upright panel on the other side, it is a "Right Side Extension" (**W3**) or "Left Side Extension" worksurface depending on which side the worksurface uses the entire thickness for support.

One final consideration are grommet holes. When ordering your worksurfaces, you may choose to have grommets or not. You may also select whether you want grommets on the right side, left side, both sides or none at all.

ORDERING CIRCULATION DESKS

Below is the actual order for the circulation desk explained on the previous pages. Each piece is numbered to match the description listed in each step. The easiest way to order a complete circulation desk is to go from left to right from the staff side of the desk as shown.

	Model Number	Description
P1	CBPLSV	Left End Panel w/Reveals- 38"H
F2	CBF554SV	Front Panel, 50' Radius w/Reveals, 54"W, 38"H
W1	CBWB554BPN	Worksurface, Both Side Extension, 50' Radius, 54"W, w/Body Pocket, No Grommets
P4	CBPTSP	Transition Middle Panel, 38"H Left Side & 33"H Right Side
F1	CBF536PV	Front Panel, 50' Radius w/Reveals, 36"W, 33"H
W2	CBWE536N	Worksurface, No Side Extension, 50' Radius, 36"W, No Grommets
P3	CBPMP	Middle Panel, 33"H
F2	CBF554PV	Front Panel, 50' Radius w/Reveals, 48"W, 33"H
W3	CBWR554	Worksurface, Right Side Extension, 50' Radius, 48"W, No Grommets
P2	CBPRPV	Right End Panel w/Reveals, 33"H

How To ORDER CIRCULATION DESKS

ORDERING CIRCULATION DESK ACCESSORIES

Now that you have your desk specified, it is time to add accessories. Several accessories can be ordered by using just one model number. All of the under-counter shelving and drawers can be configured to hold a variety of different shelving and drawer types. Because of this, the shelving/filing components are done in a build-your-own format. See the example below for an explanation.

	Model Number	Description
A1	CBWMP	Work Surface Screen - 18"W x 15"H
A2	CBFSA01	LCD Arm
A3	CBPTWR	CPU Holder - for attachment under work surface
A4	CBSNS CBSON CBSDN CBSDN CBSMN	Shelf Shell, Narrow - 38"H Pull-Out Shelf, Narrow Drawer, Narrow Drawer, Narrow Metal Adjustable Shelf, Narrow
A5	CBSWP CBSOW CBSMW CBSMW	Shelf Shell, Wide - 33"H Pull-Out Shelf, Wide Metal Adjustable Shelf, Wide Metal Adjustable Shelf, Wide
A6	CBSWP CBSCCWP	Shelf Shell, Wide - 33"H Disposal Cabinet
A7	CBSOSN	Worksurface Mounted Pull-Out Shelf w/Open Slot, Narrow
A8	CBSWP CBSOW CBSDW CBSDW CBSFW	Shelf Shell, Wide - 33"H Pull-Out Shelf, Wide Drawer, Wide Drawer, Wide File Drawer, Wide
A9	CBFSA01	LCD Arm
A10	CBWM	Work Surface Screen - 18"W x 15"H

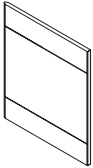

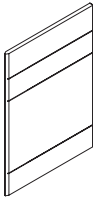

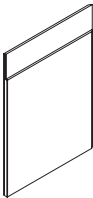

ANATOMY OF CURVED CIRCULATION DESKS

The diagram below shows the arc created by the two radius styles of circulation components. The top worksurface represents the curve created when using 50' radius worksurfaces. The bottom worksurface represents 30' radius worksurfaces. As you can see by this diagram, a 30' radius worksurface creates a more dramatic curve than the 50' radius worksurface.

REMINDER: You can interchange worksurface shapes to create you custom desk shape.

CIRCULATION DESK COMPONENTS - UPRIGHT PANELS

PRODUCT	MODEL #	DESCRIPTION
LEFT END PANEL		
	CBPLP-__	Perching Height End Panel - 33"H

	CBPTSP-__	Transition Panel - 38"H Left Side & 33"H Right Side
SHOWN 38"H LEFT SIDE/ 33"H RIGHT SIDE		

When ordering End and Middle Panels, it is essential that you keep in mind where the panel is located in relationship to the rest of the desk and how tall you wish that particular section of desk to be.

You will only have one Left End Panel and one Right End Panel for each continuous run circulation desk. All other sections of the desk will require a middle or transition panel.

If you wish to have reveals, you only need to order them with end panels. Middle Panels and Transition Panels do not have reveals.

Use Transition Panels when you are changing from one worksurface height to another worksurface height.

CBFS48P-__	48"W Front Panel - Perching Height 33"H
CBFS48S-__	48"W Front Panel - Standing Height 38"H
CBFS54P-__	54"W Front Panel - Perching Height 33"H
CBFS54S-__	54"W Front Panel - Standing Height 38"H

STRAIGHT FRONT PANEL WITH BOOK DROP SLOTS

SHOWN 48"W WITH REVEALS

CBFS36SBD-__	36"W Front Panel - Standing Height 38"H with 2 Book Drop Slots
CBFS48SBD-__	48"W Front Panel - Standing Height 38"H with 2 Book Drop Slots
CBFS54SBD-__	54"W Front Panel - Standing Height 38"H with 3 Book Drop Slots

There are four different types of front panels. When selecting front panels, keep in mind how wide and how high you want your desk. Your front panel height must be the same height as your corresponding end and middle panels.

You can mix and match the type of front panels you select within one circulation desk. For example, you may want the first two sections of your desk to be straight and the remaining three sections to have a 50' radius. However, it is imperative that the corresponding worksurface you choose matches the shape of the front panel you select.

If you decide to have reveals in your end panels, be sure to order reveals in your front panels as well.

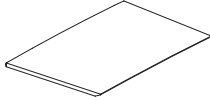

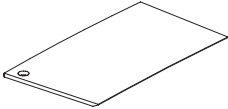

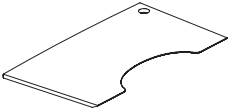

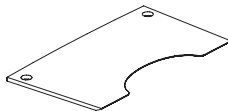

HOW TO ORDER FRONT PANELS:

Example: 54"W Front Panel Standing Height with 50' Radius and Reveals; Raven Paint; Medium Cherry Veneer

CBF554S V RN C7

Model Number Reveal (V) or No Reveal (A) Paint Color Veneer

CIRCULATION DESK COMPONENTS - 30' RADIUS WORKSURFACES

PRODUCT	MODEL #	DESCRIPTION
30' RADIUS CURVE - NO SIDE EXTENSION  SHOWN WITH NO GROMMETS	CBWE336-__	36"W Worksurface A=36", B=39 ¹ / ₄ "
	CBWE348-__	48"W Worksurface A=48", B=52 ³ / ₈ "
	CBWE354-__	54"W Worksurface A=54", B=58 ⁷ / ₈ "
	CBWE354BP-__	54"W Worksurface with Body Pocket A=54", B=58 ⁷ / ₈ "
30' RADIUS CURVE - LEFT SIDE EXTENSION  SHOWN WITH LEFT GROMMET	CBWL336-__	36"W Worksurface A=36 ¹¹ / ₁₆ ", B=40"
	CBWL348-__	48"W Worksurface A=48 ¹¹ / ₁₆ ", B=53 ¹ / ₁₆ "
	CBWL354-__	54"W Worksurface A=54 ¹¹ / ₁₆ ", B=59 ⁵ / ₈ "
	CBWL354BP-__	54"W Worksurface with Body Pocket A=54 ¹¹ / ₁₆ ", B=59 ⁵ / ₈ "
30' RADIUS CURVE - RIGHT SIDE EXTENSION  SHOWN WITH BODY POCKET AND RIGHT GROMMET	CBWR336-__	36"W Worksurface A=36 ¹¹ / ₁₆ ", B=40"
	CBWR348-__	48"W Worksurface A=48 ¹¹ / ₁₆ ", B=53 ¹ / ₁₆ "
	CBWR354-__	54"W Worksurface A=54 ¹¹ / ₁₆ ", B=59 ⁵ / ₈ "
	CBWR354BP-__	54"W Worksurface with Body Pocket A=54 ¹¹ / ₁₆ ", B=59 ⁵ / ₈ "
30' RADIUS CURVE - BOTH SIDE EXTENSION  SHOWN WITH BODY POCKET AND GROMMETS	CBWB336-__	36"W Worksurface A=37 ⁵ / ₁₆ ", B=40 ¹¹ / ₁₆ "
	CBWB348-__	48"W Worksurface A=49 ⁵ / ₁₆ ", B=53 ³ / ₄ "
	CBWB354-__	54"W Worksurface A=55 ⁵ / ₁₆ ", B=60 ⁵ / ₁₆ "
	CBWB354BP-__	54"W Worksurface with Body Pocket A=55 ⁵ / ₁₆ ", B=60 ⁵ / ₁₆ "

The most crucial aspect of ordering worksurfaces is to make sure they match the shape and width of the corresponding front panel. In addition, you need to know how the worksurface fits into the rest of the desk. See the diagram on the facing page to understand which worksurface you need to order based on where the worksurface fits into the unit.

At this time you need to decide what type of laminate and whether or not you want grommets. All of these choices must be reflected in your model number for the worksurface (see example below).

DIMENSION KEY

EXAMPLES - CORNER UNITS

EXAMPLES OF CORNER UNITS

Bretford offers a variety of corner options for your circulation desk. Each corner unit is designed to provide storage space below it rather than creating unusable space.

Below are diagrams of four different corner unit options. As you can see in the bottom two diagrams, a shelving shell has been placed to create additional storage.

Corner units are ordered using the same philosophy as the rest of the circulation desk. A front panel and corresponding worksurface must be ordered separately. The upright panels for the corner units are shared with the rest of the desk. The shelving shell and shell components are ordered separately as well.

90° CURVED CORNER UNIT

Model Number Laminate Edge Stain Color

CIRCULATION DESK COMPONENTS - INTERNAL COMPONENTS

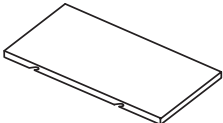

PRODUCT	MODEL #	DESCRIPTION
NARROW SHELVING SHELL		
	CBSNP-__	Shelf Shell, Narrow - 33"H *
	CBSNS-__	Shelf Shell, Narrow - 38"H *
	* For Use with Worksurfaces with Body Pocket	

WIDE SHELVING SHELL		
	CBSWP-__	Shelf Shell, Wide - 33"H
	CBSWS-__	Shelf Shell, Wide - 38"H

ADJUSTABLE SHELVES		
	CBSMN-__	Metal Adjustable Shelf, Narrow
	CBSMW-__	Metal Adjustable Shelf, Wide
	CBSWN-__	Wood Adjustable Shelf, Narrow
	CBSWW-__	Wood Adjustable Shelf, Wide

FILE DRAWERS		
	CBSFN-__	File Drawer, Narrow
	CBSFW-__	File Drawer, Wide

DRAWER		
	CBSDN-__	Drawer, Narrow
	CBSDW-__	Drawer, Wide

PULL-OUT SHELVES		
	CBSON-__	Pull-Out Shelf, Narrow
	CBSOW-__	Pull-Out Shelf, Wide

When ordering internal components, you first need to order a Shelving Shell. You may select from two widths, Narrow and Wide, and two heights, 33" and 38". It is recommended you order a Narrow Shelving Shell if you have a 54"W worksurface with a Body Pocket. A Wide Shelving Shell will interfere with the opening created by the Body Pocket.

After selecting your shell size, you may select the type of components you want to go in it. Keep in mind that you should only use File Drawers near the bottom of the unit. This will prevent the shelving unit from tipping over. You may use a File Drawer as the top drawer as long as you place another file drawer below it. Placing a File Drawer on top and shelves below will make the unit top heavy causing it to tip over.

The File Drawer and Drawer can be ordered with or without a lock. Specify which you would like in the model number (see example below).

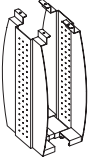

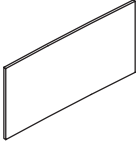

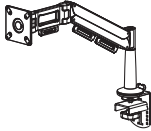

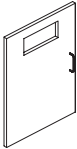

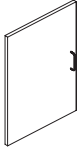

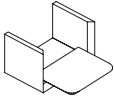

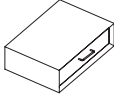

HOW TO ORDER INTERNAL COMPONENTS:
Example: File Drawer Narrow with Lock; Raven Paint;
Medium Cherry Veneer

CBSFN L RN C7
 Model Number Locking (L) or Non-Locking (N) Paint Color Veneer

HOW TO ORDER ACCESSORIES:
Example: Metal Adjustable Shelf Wide; Raven Paint

CBSMW RN
 Model Number Paint Color

CIRCULATION DESK COMPONENTS - ACCESSORIES

ORDERING POWER OPTIONS

Most people are intimidated or nervous when dealing with electrical issues. This step-by-step guide is for people who may not be familiar with electrical systems, but are responsible for specifying such systems when ordering furniture. It provides a basic understanding of an 8-wire, 4-circuit (20 amp per circuit) system and how to specify it. By following the simple steps outlined here, one can easily determine how many circuits are required to ensure safety when using electrical equipment.

The Bretford Technology Carrels featured in this guide have separate raceways for voice and data wires and meet Category 5 Performance Requirements. Data receptacles on Bretford tables utilize the Amp, Inc. 110 Connect Series jacks. For a list of Amp distributors in your area, call the Amp Information Center at 1-800-522-6752.

Electrical components are UL-Listed and manufactured in accordance with National Electric Code requirements. Certain cities and municipalities may have additional requirements.

STEP 1

Figure out how many amps you will be running.

An amp is a unit of measure that tells how much electricity a machine is drawing from an electrical system. On your computer or electrical device, locate the faceplate that describes the machine's technical features. The amps are usually displayed like this: INPUT: 120 V ~ 1.8 A. If you cannot find this information on the machine, it may be located in the owner's manual.

STEP 2

Calculate the total number of amps per powered series.

A powered series is the total number of amps from which you are drawing power off of one power feed. In our case, it could be a row of carrels joined together with many power receptacles. Add up the number of amps (determined in STEP 1) for each machine being powered off the series. In our example, we've used an estimate of 3 amps for each computer and monitor. Please note that all equipment is different and will vary by machine.

STEP 3

Divide by 16.

Although each circuit is rated for 20 amps of intermittent use, most computers and machinery in an office environment are used continually for many hours. In this type of situation, the National Electric Code restricts the circuits to 16 amps of continuous use. So, divide the sum of the amps (determined in STEP 2) by 16.

STEP 4

This is the number of circuits your power series requires.

In most cases, this number is a decimal. Round up to the next whole number, which is the number of circuits required to run your equipment safely. If the number you arrived at is greater than 4 (the most amount of circuits the system will handle), you will have to decrease some of the power being used on this system or create another system with a new power feed.

STEP 5

Repeat Steps 1-4 for each remaining powered series.

This would apply if you have sections of the circulation desk which require power divided by other sections that don't or if you have multiple Circulation Desks. Remember, you must go through this process for each system that runs off its own power feed.

Now that we know how many circuits each powered series will need, let's see how it applies to different types of Bretford Circulation Desks.

Bretford's 8-wire, 4-circuit system uses Duplex receptacles (each duplex has two power outlets) to determine from which circuit the electrical equipment will draw power. The receptacles are marked 1, 2, 3, or 4 to designate the circuit that is activated when it is installed into the PowerHarness. Circuits 1, 2, and 3 all share a common ground while circuit 4 has a separate ground of its own and a neutral wire. This makes Circuit 4 perfect for more sensitive equipment like printers and powerful computers.

If your system requires 2 circuits, specify Duplexes 1 and 2 along the entire system to access those specific circuits. Here is an example of what a 2-circuit single-faced carrel system will require:

- (2) 36"W Circulation Desk Sections
- (2) Hardwire Power Systems
- (2) Duplex Circuit 1
- (2) Duplex Circuit 2
- (1) Hardwire Power Feed

Here is an example of what a 4-circuit circulation desk will require:

- (2) 54"W Circulation Desk Sections
- (1) 36"W Circulation Desk Sections
- (3) Hardwire Power Systems (54"W Power Systems actually include 2 Power Systems and 1 jumper)
- (3) Duplex Circuit 1
- (3) Duplex Circuit 2
- (2) Duplex Circuit 3
- (2) Duplex Circuit 4
- (2) Jumpers
- (1) Hardwire Power Feeds

Reminder:

All Hardwire Power Systems can accept a data attachment. While the data attachment includes cut outs for data jacks, no data jacks are included. Therefore, they must be purchased separately.

Meets Category 5 Requirements.

ORDERING POWER OPTIONS: HARDWARE

Electrical Applications: Model Numbers for all of these products are on the following two pages. For heavy power usage, which require multiple circuits, specify the hardwire power system.

NOTE: Must be installed by a licensed electrician.

Example of Circulation Desk Order Codes:

CBPLP
Left End Panel
CBFS36P
Front Panel
CBWBS36
Front Panel
CBPRP
Right End Panel

STEP 1 Specify Circulation Desk Unit (pages 62-66)

(designated by grey shaded area on picture)

- Choose the size, height, shape and finish for the Circulation Desk Unit.

PowerHarness Order Code:

CBPLP
CBFS36P
CBWBS36
CBPRP
CBCS 36
Power System Width

STEP 2 Specify Power System (page 78)

(designated by grey shaded area on picture)

- Power System should be specified according to width of Circulation Desk Section ordered.
- One Power System is required per section of Circulation Desk you want to be powered.
- 48"W and 54"W includes two Power Systems and a Jumper to connect the two.

Duplex Order Code:

CBPLP
CBFS36P
CBWBS36
CBPRP
CBCS 36
(2) DUPLC _ _
Duplex

SIMPLEX Order Code:

SIMP _ _
Simplex

STEP 3 Specify Receptacle (page 78)

(designated by grey shaded area on picture)

- Choose two receptacles per Power System.
- See pages 74-75 for information on ordering circuits.

Power Feed Order Code:

CBPLP
CBFS36P
CBWBS36
CBPRP
CBCS 36
(2) DUPLC__
CBCDATA
Data Attachment

STEP 4 Specify the Data Attachment (page 78)

(designated by grey shaded area on picture)

- If you wish to add data to your circulation desk, specify the data attachment.
- One data attachment connects to each power system.
- Data attachments do not include data jacks.

Power Feed Order Code:

CBPLP
CBFS36P
CBWBS36
CBPRP
CBCS 36
(2) DUPLC__
CBCDATA
CBCPF
Power Feed

STEP 4 Specify the Power Feed (page 78)

(designated by grey shaded area on picture)

- One power feed is required per circulation desk configuration.
- A power feed is required for each continuous section of desk that has power.
- Power feed includes a leg chase that separates power and data wiring.

Please note: Each power feed must be installed by a licensed electrician.

Power Jumper Order Code:

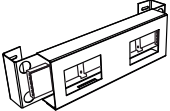

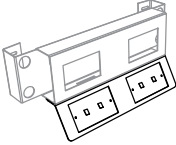

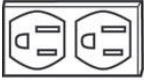

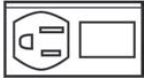

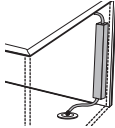

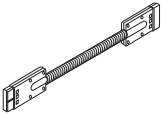

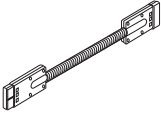

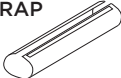

CBPLP
CBFS36P
CBWBS36
CBPRP
CBCS 36
(2) DUPLC__
CBCDATA
CBCPF
CBJMP19
Power Jumper

Step 5 Specify Power Jumpers to connect Carrels (page 78)

(designated by grey shaded area on picture)

- Specify one power jumper between each set of circulation desk sections.
- The unit connects power between all circulation desk sections.
- See page 79 for information on ordering Power Jumpers.

CIRCULATION DESK COMPONENTS - HARDWIRE ELECTRICAL COMPONENTS

PRODUCT	MODEL #	DESCRIPTION
HARDWIRE POWER SYSTEM		
	CBCS36-__	Power System for 36"W Units
	CBCS48-__	Power System for 48"W Units
	CBCS54-__	Power System for 54"W Units
DATA ATTACHMENT		
	CBCDATA-__	Data Attachment for use with any Power System
DUPLEX		
	DUPLC11	Duplex - Circuit 1
	DUPLC22	Duplex - Circuit 2
	DUPLC33	Duplex - Circuit 3
	DUPLC44	Duplex - Circuit 4
SIMPLEX		
	SIMP11	Simplex Surge Protected Outlet - Circuit 1
	SIMP22	Simplex Surge Protected Outlet - Circuit 2
	SIMP33	Simplex Surge Protected Outlet - Circuit 3
	SIMP44	Simplex Surge Protected Outlet - Circuit 4
POWER FEED		
	CBCPF-__	Power Feed with Power Chase
JUMPERS		
	CBJMP13	Power Jumper - 13"L
	CBJMP19	Power Jumper - 19"L
	CBJMP25	Power Jumper - 25"L
	CBJMP27	Power Jumper - 27"L
	CBJMP28	Power Jumper - 28"L
CORNER UNIT JUMPERS		
	CBJMP22S	Power Jumper for 22½° Straight Corner
	CBJMP22C	Power Jumper for 22½° Curved Corner
	CBJMP45S	Power Jumper for 45° Straight Corner
	CBJMP45C	Power Jumper for 45° Curved Corner
	CBJMP90S	Power Jumper for 90° Square Corner
	CBJMP90C	Power Jumper for 90° Curved & Hexagonal Corner
CABLE WRAP		
	CBCFCW	Fabric Cable Wrap - 6'L

Hardwiring your circulation desk is very easy. Begin with a power system. This includes a metal inclosure as well as a power harness. The power harness accepts duplexes and simplexes. 36"W Power Systems includes one metal inclosure and power harness while 48"W and 54"W power systems include two metal enclosures, two power harnesses and one jumper to connect the two.

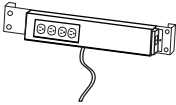

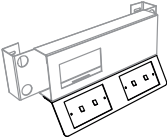

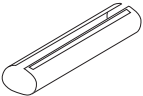

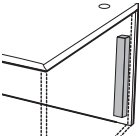

Data attachments attach directly to the metal enclosure of the power system. The data attachment includes plates with cut-outs for data jacks however data jacks are not included.

The Power Feed includes a 12' long cable with a metal housing to provide a safe and attractive way to bring power from the floor to the power system. The metal housing allows for separation of power and data.

A variety of power jumpers are available allowing for the connection of power between any combination of circulation desk sections. See the listings to the right to determine which jumper to specify.

The cable wrap is a 6' long cloth cable management option. It velcros easily to hide cords and wires.

CIRCULATION DESK COMPONENTS - SOFTWARE ELECTRICAL COMPONENTS

PRODUCT	MODEL #	DESCRIPTION
SOFTWARE POWER SYSTEM		
	CBCCFPS-__	4-Outlet Electrical Unit with Bracket
DATA ATTACHMENT		
	CBCDATA-__	Data Attachment for use with any Power System
CABLE WRAP		
	CBCFCW	Fabric Cable Wrap - 6'L
METAL CHASE		
	CBCHASE-__	Metal Chase

The software Power System includes a metal enclosure and a 4-outlet electrical unit with on/off switch.

Data attachments attach directly to the metal enclosure of the power system. The data attachment includes plates with cut-outs for data jacks however data jacks are not included.

The cable wrap is a 6' long cloth cable management option. It velcros easily to hide cords and wires.

The metal chase attaches to the upright panel of the circulation desk. It allows for cords to neatly pass to the floor.

JUMPER SIZE GUIDE:

Below is a guide to determine which jumper size is needed.

CBJMP13

Use the CBJMP13 to connect the following two sized circulation desk power systems together.

48"W 30' Radius and
 • 48"W 30' Radius
 • 54"W 30' Radius
 • 48"W 50' Radius
 • 54"W 50' Radius

54"W 30' Radius and
 • 54"W 30' Radius
 • 54"W 50' Radius

48"W 50' Radius and
 • 48"W 50' Radius
 • 54"W 50' Radius

54"W 50' Radius and
 • 54"W 50' Radius

48"W Straight and
 • 48"W 30' Radius
 • 54"W 30' Radius
 • 48"W 50' Radius
 • 54"W 50' Radius
 • 48"W Straight
 • 54"W Straight

CBJMP19

Use the CBJMP19 to connect the following two sized circulation desk power systems together.

36"W 30' Radius and
 • 48"W 30' Radius
 • 54"W 30' Radius
 • 48"W 50' Radius
 • 54"W 50' Radius

36"W 50' Radius and
 • 48"W 50' Radius
 • 54"W 50' Radius

48"W Straight and
 • 48"W 30' Radius
 • 54"W 30' Radius
 • 48"W 50' Radius
 • 54"W 50' Radius
 • 48"W Straight
 • 54"W Straight

48"W Straight and
 • 36"W 30' Radius
 • 36"W 50' Radius

54"W Straight and
 • 36"W 30' Radius
 • 36"W 50' Radius

CBJMP25

Use the CBJMP25 to connect the following two sized circulation desk power systems together.

36"W Straight and
 • 36"W Straight

CBJMP27

Use the CBJMP27 to connect the following two sized circulation desk power systems together.

36"W 50' Radius and
 • 36"W 50' Radius

36"W Straight and
 • 36"W 30' Radius
 • 36"W 50' Radius

CBJMP28

Use the CBJMP28 to connect the following two sized circulation desk power systems together.

36"W 30' Radius and
 36"W 30' Radius
 36"W 50' Radius

CARRELS

The Legacy Library System continues with the spirit of flexibility and modularity by offering Study Carrels, Computer Carrels and Patron Access Stations.

- Carrels are available in three different types for optimum patron use.
- Computer Carrels and Patron Access Stations feature convenient top-down wire management.
- Handsome end panels with durable worksurfaces ensure years of use.
- Height adjustable worksurfaces accommodate virtually any user.
- Single- or double-faced units allow for unlimited layout possibilities.
- Uses the starter/add-on system to enable space saving configurations.

SPECIFICATION INFORMATION

CARRELS

Legacy Carrels are available in both starter and add-on units in order to easily construct any length range. The Legacy Carrels are also offered in single- and double-faced configurations. Each panel has 1" leg leveling glides that screw into pre-threaded metal inserts. Sized at 48" high and 30" deep for single-faced, and 60" deep for double-faced.

Measurements for 36"W Study and Computer Carrels and Patron Access Stations:

- Each wood veneer starter unit including hardware measures 37¹/₈"W and add-on unit including hardware measures 36¹/₁₆"W.
- Each laminate starter unit including hardware measures 37³/₁₆"W and add-on unit including hardware measures 36³/₃₂"W.

Measurements for 48"W Computer Carrels:

- Each wood veneer starter unit including hardware measures 49¹/₈"W and add-on unit including hardware measures 48¹/₁₆"W.
- Each laminate starter unit including hardware measures 49³/₁₆"W and add-on unit including hardware measures 48³/₃₂"W.

Measurements for End-Of-Run Patron Access Stations:

- Each wood veneer or laminate unit including hardware measures 23"W or 27"W.

Wood Carrels:

Legacy upright panels are constructed of 1" thick, 45 lb. density, industrial grade particle board covered on both sides with A-grade plain sliced and book matched wood veneer. Bull-nosed edge treatments are constructed using solid hardwood, FAS select or better. Single-faced panels have a ⁹/₁₆" radius top front corner and 90 degree back to fit flush against a wall. Double-faced units have a ⁹/₁₆" radius top front and back corners. All upright panels have a UV cured finish.

Laminate Carrels:

Legacy upright panels are constructed of 1" thick, 45 lb. density industrial grade, particle board covered on both sides with a neutral, non-glare .050" thick horizontal grade high-pressure laminate. Edge treatments are constructed using a 3mm PVC T-Mold edge. Single-faced panels have a ⁹/₁₆" radius top front corner and 90 degree back to fit flush against a wall. Double-faced units have a ⁹/₁₆" radius top front and back corners.

Back Panels for Wood Carrels:

Back Panels are constructed of 1" thick, 45 lb. density, industrial grade particle board on both sides with A-grade plain sliced and book matched wood veneer and a solid ³/₈" thick, hardwood edge treatment.

Back Panels for Laminate Carrels:

Back Panels are constructed of 1" thick, 45 lb. density industrial grade particle board on both sides with neutral, non-glare .050" thick horizontal grade high-pressure laminate, and a 3mm PVC T-Mold edge.

Work Surfaces for Wood Carrels:

Work Surfaces are attached using a specially designed, 14-gauge steel bracket that allows you to set the work surface at either 26¹/₂" or 29" high. 32" high ADA heights is available. The Patron Access Station's work surface is at 39" stand up height. Work surface is 1" thick, 45 lb. density, industrial grade particle board covered with .050" thick horizontal grade high-pressure, laminate surface. The Computer Carrel work surface is also supported by a 9-gauge steel stiffener.

Top Dimensions:

- **Study Carrel:** 35"W x 1"H x 26"D
- **Patron Access Station:** 34"W x 1"H x 26"D
- **Computer Carrel:** 47"W x 1"H x 26"D

Work Surfaces for Laminate Carrels:

Work Surfaces are attached using a specially designed, 14-gauge steel bracket that allows you to set the work surface at either 26¹/₂" or 29" high. 32" high ADA heights is available. The Patron Access Station's work surface is at 39" stand up height. Tabletop is 1" thick, 45 lb. density industrial grade particle board covered with .050" thick horizontal grade high-pressure laminate surface, and a 3mm PVC T-Mold edge. The Computer Carrel work surface is also supported by a 9-gauge CRS stiffener.

Top Dimensions:

- **Study Carrel:** 35"W x 1"H x 26"D
- **Patron Access Station:** 34"W x 1"H x 26"D
- **Computer Carrel:** 47"W x 1"H x 26"D

Reference Shelf for Wood Carrels:

(standard only on the Study Carrel): Reference Shelf is 8" deep and constructed using 1" thick, industrial grade particle board and .050" thick horizontal grade, high-pressure laminate. The solid hardwood edge banding finishes the shelf. The shelf is fixed at 5" below the top of the carrel.

Reference Shelf for Laminate Carrels:

(standard only on the Study Carrel): Reference Shelf is 8" deep and constructed using 1" thick, industrial grade particle board and .050" thick horizontal grade, high-pressure laminate. 3mm PVC T-Mold edge finishes the shelf. The shelf is fixed at 5" below the top of the carrel.

Cord Management:

(standard only on the Computer and Patron Access Carrels): Cord Management includes a cover, which measures 5" deep x 34³/₃₂" wide for the Patron Access Station and the 36" wide Computer Carrel or 46³/₃₂" wide for the Computer Carrel, with a flush mounted brass key lock located in the center for security. The extra large cord management tray is constructed using 18-gauge steel and measures 8³/₄" high x 4¹/₂" deep. The back brace is also made out of 18-gauge steel and has 30 degree lip for attaching a four-outlet surge protected power strip.

Tilt Monitor Stand:

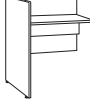

The Tilt Monitor Stand is angled 18 degrees, constructed from 14-gauge steel and has four non-skid/non-mar rubber feet. For use with single- and double-faced Patron Access Stations. Finished in durable powder paint.

Dimensions: 20"W x 14¹/₁₆"D x ³/₄"H front, 5"H back

TIP: Legacy Library furniture comes in a variety of paint finishes, laminates and veneers. See page 7 for options.

SINGLE-FACED CARRELS

PRODUCT	WOOD MODEL #	LAMINATE MODEL #	DESCRIPTION	WORK SURFACE HEIGHT
STUDY CARRELS				
 STARTER  ADD-ON	LSSCS-__	LAMSSCS-__	30"D x 36"W x 48"H, Starter	26½" or 29"

	LS27PASS-__	LAMS27PASS-__	30"D x 27"W x 48"H, for use with 12"D Double-Faced Shelving Unit	39"

Bretford's Carrels come in three different styles: Study Carrels, Computer Carrels and Patron Access Stations. Each one was designed to best suit the type of work done at the unit. Study Carrels feature a shelf for placing books and study materials. Computer Carrels feature an open work space for accommodating computer equipment. Patron Access Stations are at stand-up height to provide for walk-up access.

Computer Carrels and Patron Access Stations come with a cord management bin for organizing cords and wires from computer equipment.

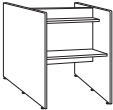

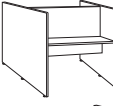

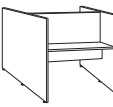

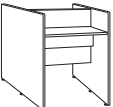

The End-Of-Run Patron Access Station fits perfectly at the end of 10"D or 12"D Double-Faced Shelving Units for a great walk-up station. End-Of-Run Station is only available as a stand-alone unit (no add-on unit available).

READING TABLES

Bretford offers two styles of Legacy Reading Tables, Traditional or Contemporary, in three shapes to fit any existing decor or need.

- Legs and edge treatments are made of beautiful hardwood for years of use.
- Traditional style work surfaces are constructed of solid lumber core and are covered with a durable, high-pressure laminate for easy cleaning.
- Contemporary style work surfaces are constructed of industrial grade particle board and are covered with a durable, high-pressure laminate.
- Four standard heights are available to accommodate everyone, including ADA requirements.
- Available in several widths and lengths for multiple uses.

SPECIFICATION INFORMATION

READING TABLES

The Legacy Library System includes reading tables that are ideal for group study areas, book displays, or small collections of reference or informational materials. Legs and edge treatments are hardwood constructed with rounded edges which create a smooth, finished look. Worksurfaces are finished in a durable laminate that provides years of lasting use.

Traditional Style Table Tops:

Each traditional table top is constructed of 1/4" thick, three-ply, solid lumber core panel covered with .050" thick high pressure laminate with .028" thick backer. Edge treatments are 1/16" thick solid hardwood, FAS select or better, that is kiln dried to a moisture content of less than 7%. Each top has a 3/4" x 1 3/8" solid hardwood support rail that spans between each leg assembly.

Contemporary Style Table Tops:

Each contemporary (apron-less) table top is constructed of 1/4" thick industrial grade particle board covered with .050" thick high pressure laminate with .028" thick backer. Drop edge treatments measure 1 3/4" high and are 1/16" thick, solid hardwood, FAS select or better, that is kiln dried to a moisture content of less than 7%.

Worksurface Heights:

Tables are available in the following worksurface heights:

- Juvenile (J) is 25"H
- Youth (Y) is 26 1/2"H
- Adult (A) is 29"H
- Wheelchair (W) is 32"H.

Table Top Support:

All table tops 60" or longer are supported with a 14-gauge steel square keel. All table tops 90" long and/or 48" wide have two, 14-gauge CRS square keels running in parallel.

Leg Construction:

Legs are 2 7/8" square glued-up solid hardwood, FAS select and better.

Leg Assembly:

Legs are attached using a 5" square x 5/16" thick plate. The leg is attached by two 5/16" x 3" machine bolts that screw into a double 5/16", 18 barrel nut embedded into the leg. The steel plate is attached to the table top using five, 5/16" - 18 x 1/4" hex head machine bolts that screw into pre-threaded metal inserts.

CROSS SECTION OF
TABLE LEG CONSTRUCTION

Leg Leveling Glides:

Each leg has a 1 3/4" diameter x 1/2" long leg leveling glide that screws into a pre-threaded metal insert.

METAL APRON READING TABLES

Bretford's new Metal Apron Reading Tables are a slightly less-expensive reading tables.

- Metal Aprons provide the structural integrity the table needs but also allows you to bring an additional color in to a room.
- Work surfaces are constructed of solid lumber core and are covered with a durable, high-pressure laminate for easy cleaning.
- Four standard heights are available to accommodate everyone, including ADA requirements.
- Available in several widths and lengths for multiple uses.

SPECIFICATION INFORMATION

METAL APRON READING TABLES

Bretford's Metal Apron Reading Tables contain the same durability as Bretford's Traditional and Contemporary Reading Tables. The metal aprons are finished in powder paint. Legs and edge treatments are hardwood constructed with rounded edges which create a smooth, finished look. Worksurfaces are finished in laminate that provides years of lasting use.

Table Tops:

Each table top is constructed of 1" thick, particle board covered with a horizontal grade .050" thick high pressure laminate with .028" thick backer. Edge treatments are 11/16" thick solid hardwood, FAS select or better, that is kiln dried to a moisture content of less than 7%. Each top has a 13/8" metal support rail that spans between each leg assembly. Metal apron is finished in powder paint for durability.

Worksurface Heights:

Tables are available in the following worksurface heights:

- Juvenile (J) is 25"H
- Youth (Y) is 261/2"H
- Adult (A) is 29"H
- Wheelchair (W) is 32"H.

Leg Construction:

Legs are 21/8" square glued-up solid hardwood, FAS select and better.

Leg Assembly:

Legs are attached using a 5" square x 5/16" thick plate. The leg is attached by two 5/16" x 3" machine bolts that screw into a double 5/16", 18 barrel nut embedded into the leg. The steel plate is attached to the table top using five, 5/16" - 18 x 1" hex head machine bolts that screw into pre-threaded metal inserts.

Leg Leveling Glides:

Each leg has a 13/4" diameter x 11/2" long leg leveling glide that screws into a pre-threaded metal insert.

TIP: Legacy Library furniture comes in a variety of paint finishes, laminates and veneers. See page 7 for options.

CHAIRS

Bretford offers five styles of Legacy Library Chairs.

- All parts are constructed from European Beech Hardwood.
- Two styles of four-leg chairs, Grand and Traditional. Grand is available with or without arms.
- Four-leg chairs are stained to match any Legacy Library Environment product.
- Two styles of sled-base chairs, Sled-Base and Two-Position, are available in three finishes.
- Four-Leg Chairs are available in all wood or with an upholstered seat.
- Sled-Base Chairs are available in all wood or with an upholstered seat and back.
- The Wood Stacking Chair is available in two finishes and in three sizes.

SPECIFICATION INFORMATION

FOUR-LEG LIBRARY CHAIRS

Bretford offers two types of Four-Leg Library Chairs: The Traditional and the Grand. Both styles are available in chair and stool height.

Traditional Four-Leg Chair:

The Traditional Chair and barstool are styled to the classic "Library" design. Details such as the elegant, slightly fanned back with six slats and decorative brackets on the edge of the seat give this chair a timeless design. Upholstered seats as well as solid wood seats are available. The wood seats are sculpted to ensure a comfortable sitting position. The Traditional Chair is non-stacking.

Chair Dimensions: Overall Dimensions: 21"D x 34½"H; Seat Dimensions: 18"W x 16½"D x 18"H

Barstool Dimensions: Overall Dimensions: 19¾"D x 43½"H; Seat Dimensions: 18"W x 16½"D x 30"H

Grand Four-Leg Chair:

The Grand Four-Leg Chair is extremely sturdy seating line that includes a side chair, armchair, barstool, and matching benches. The side rails are extra thick to support the weight of people climbing up and leaning onto the chair next to them. The back slats are raised from the seat to allow for easy cleaning. Upholstered seats as well as solid wood seats are available. The wood seats are sculpted to ensure a comfortable sitting position. The Grand Chair is non-stacking.

Chair Dimensions: Overall Dimensions: 19"D x 35"H; Seat Dimensions: 18"W x 16½"D x 18"H

Barstool Dimensions: Overall Dimensions: 19"D x 47"H; Seat Dimensions: 18"W x 16½"D x 30"H

Armchair Dimensions: Overall Dimensions: 19"D x 35"H; Seat Dimensions: 18"W x 16½"D x 18"H; Arm Height: 26½"; Arm Width Outside: 21½"; Arm Width Inside: 19"

Bench Dimensions: Overall Dimensions: 42"W or 60"W x 17"D x 35"H; Seat Dimensions: 16"D x 18"H

Armed Bench Dimensions: Overall Dimensions: 42"W or 60"W x 17"D x 35"H; Seat Dimensions: 16"D x 18"H; Arm Height: 28"; Arm Width Outside: 48" or 66"

Grand Sled-Base Chair:

The Grand Sled-Base Chair features the same durable construction as its four-legged counterparts. Upholstered seats as well as solid wood seats are available. The wood seats are sculpted to ensure a comfortable sitting position. The Grand Sled-Base Chair is non-stacking. It is available with an 16" or 18" high seat.

18"H Chair Dimensions: Overall Dimensions: 18"D x 33"H; Seat Dimensions: 16¾"W x 18½"D x 18"H

16"H Chair Dimensions: Overall Dimensions: 15"D x 31"H; Seat Dimensions: 14"W x 15½"D x 16"H

Wood:

Constructed from 100% Solid European Beech Hardwood.

Construction:

Joints connected using mortise and tenon construction. Chairs are glued with high solids glue and reinforced with 18-gauge nails, corner blocks and low root wood screws. Standard kickplates on the barstool crossbar support are brass.

9-Step Finishing Process:

Traditional and Grand Four-Leg Chairs are available in any of Bretford's finishes. Below is the process used for finishing the chairs.

1. The bare wood of the assembled chair is thoroughly sanded using 120 grit paper.
2. One coat of stain is sprayed onto the entire chair - including the underside of the seat.
3. The stain is handwiped to ensure an even color and maximum penetration into the wood.
4. The chair is inspected and any necessary adjustments made.
5. One coat of a catalyzed sealer is sprayed onto all wood parts to completely seal the wood - including the underside of the seat.
6. Once dry, the sealer is sanded using 320 grit paper.
7. A final sanding is done using Scotch Brite pads to remove any sanding marks.
8. A catalyzed lacquer is sprayed on. This lacquer is very durable and will stand up in a commercial environment.
9. A final inspection is performed prior to packaging to ensure a high level of quality control.

Fabric and Foam:

There are several standard fabric options (Shire and Sherpa) available specifically for these chairs. Bretford's standard fabric offering (this does NOT include Shire and Sherpa) found in the Fabric and Finish Guide can be used on these chairs but will be viewed as a COM situation. Fabric required for COM is .35 yd. Note: This is the estimated amount based on 54" wide material. The actual amount required may vary depending on special pattern matching and the width of the material. The cushion foam is high density foam measuring 1.5" thick on the seat.

SPECIFICATION INFORMATION

BASIC LIBRARY CHAIRS

Bretford offers three types of Basic Library Chairs: Sled-Base, Two-Position and Four-Leg.

Sled-Base Chair:

The Sled-base chair is designed with a sled base for excellent stability. This chair is extremely durable yet comfortable, making them suitable for frequent, extended use.

Chair Dimensions: Overall Dimensions: 20"W x 23³/₄"D x 33"H; Seat Dimensions: 17¹/₂"W x 18"D x 18"H

Two-Position Chair:

The Two-position chair is designed with a sled base that stabilizes in at an upright position as well as in a leaned back position. This flexibility provides comfort and safety when leaning back in the chair. The Campus 2-position chair is built to withstand the distribution of weight at two points and the sled base ensures the flooring will be preserved.

Chair Dimensions: Overall Dimensions: 20"W x 23"D x 32¹/₂"H; Seat Dimensions: 17¹/₂"W x 18"D x 18"H

Four-Leg Chair:

The Four-leg chair matches the Sled-base and Two-Position chair to complete this line of school study chairs. All models are extremely durable yet comfortable, making them suitable for frequent, extended use.

Chair Dimensions: Overall Dimensions: 20"W x 22³/₄"D x 33"H; Seat Dimensions: 17¹/₂"W x 18"D x 18"H

Wood:

Constructed from 100% European Beech Hardwood (uniform layers inside and out).

Construction:

Legs, back and seat supports are made of 22 plies to a finished thickness of 1³/₁₆". The leg rail is made of 21 plies with a finished thickness of 1⁵/₁₆". The seat panel when upholstered is made of 8 plies to a finished thickness of 7/₁₆". The front edge is rounded for comfort. The chair back when upholstered back is made of 8 plies to a finished thickness of 7/₁₆". The seat and chair back with no upholstery is made of 15 plies to a finished thickness of 7/₈". The chair is assembled with dowels that are connected with metal to metal hardware and reinforced with high solids glue.

8-Step Finishing Process:

These chairs are available only in three finishes: Natural Maple, Natural Cherry and Medium Cherry. Below is the process used for finishing the chairs.

1. The bare wood components of the chair are thoroughly sanded using 120 grit paper.
2. One coat of stain is sprayed onto all sides of the wood components.
3. The chair components are inspected and any necessary color adjustments made.
4. One coat of a nitrocellulose sealer is sprayed onto all wood parts to completely seal the wood.
5. Once dry, the sealer is sanded using 320 grit paper.
6. A nitrocellulose lacquer is sprayed on.
7. The wood and upholstered components are then assembled.
8. A final inspection is performed prior to packaging to ensure a high level of quality control.

Fabric and Foam:

There are several standard fabric options (Shire and Sherpa) available specifically for these chairs. Bretford's standard fabric offering (this does NOT include Shire and Sherpa) found in the Fabric and Finish Guide can be used on these chairs but will be viewed as a COM situation. Fabric required for COM is .75 yd. Note: This is the estimated amount based on 54" wide material. The actual amount required may vary depending on special pattern matching and the width of the material. The cushion foam is high density foam measuring 1¹/₈" thick on the seat and 3/₄" thick on back.

STACKING LIBRARY CHAIRS

The stylish, modern stacking chair is unbeatable in its good value. This stacking chair is built to withstand constant use so it is suited for many high traffic areas such as schools, conference rooms and restaurants. The stacking chair stacks well to six chairs high.

Chair Dimensions: Overall Dimensions: 19"W x 19"D x 32¹/₂"H; Seat Dimensions: 16¹/₄"W x 16"D x 18"H

Wood:

Constructed from 100% European Beech Hardwood (uniform layers inside and out).

Construction:

Legs are made of 14 plies to a finished thickness of 1¹/₁₆". The seat and back supports are made of 15 plies with a finished thickness of 1¹/₁₆". The leg rail is made of 13 plies with a finished thickness of 3/₄". The seat panel is made of 8 plies to a finished thickness of 3/₈". The front edge is rounded for comfort. The chair back is made of 8 plies to a finished thickness of 3/₈". The chair is reinforced with metal to metal hardware and reinforced with high solids glue.

8-Step Finishing Process:

These chairs are available only in two finishes: Natural Maple, Two-Tone Medium Cherry and Black. Below is the process used for finishing the chairs.

1. The bare wood components of the chair are thoroughly sanded using 120 grit paper.
2. One coat of stain is sprayed onto all sides of the wood components.
3. The chair components are inspected and any necessary color adjustments made.
4. One coat of a nitrocellulose sealer is sprayed onto all wood parts to completely seal the wood.
5. Once dry, the sealer is sanded using 320 grit paper.
6. A nitrocellulose lacquer is sprayed on.
7. The wood and upholstered components are then assembled.
8. A final inspection is performed prior to packaging to ensure a high level of quality control.

	LHBDS16-__	Grand Youth Sled-Base Chair - 16 1/2"D x 28 3/4"H	16"

Bretford's Grand Four-Leg Chair is available in a variety of styles. Choose from chairs with arms, benches or barstools. The Chairs and Barstool are available either as all wood or with seat fabric (benches can not be upholstered). There are several standard fabric options (Shire, Sherpa and Vinyl) available specifically for these chairs. Bretford's standard fabric offering (this does NOT include Shire and Sherpa) found in the Fabric and Finish Guide can be used on these chairs but will be viewed as a COM situation.

These chairs are available in any of Bretford's veneer finishes to match the rest of the library.

BASIC CHAIRS

PRODUCT	MODEL #	DESCRIPTION	SEAT HEIGHT
SLED-BASE			
	LHCPSB-__	Basic Sled-Base Chair - 20"W x 23 ³ / ₄ "D x 33"H	18"
TWO-POSITION			
	LHCPTP-__	Basic Two-Position Chair - 20"W x 23"D x 32 ¹ / ₂ "H	18"
FOUR-LEG			
	LHCPSK-__	Basic Four-Leg Chair - 20"W x 22 ³ / ₄ "D x 33"H	18"

Bretford's Basic Chairs are available in three different styles allowing you to place a variety of seating styles in your library but still match. Each is available with either a wood or upholstered seat and back. There are several standard fabric options (Shire, Sherpa and Vinyl) available specifically for these chairs. Bretford's standard fabric offering (this does NOT include Shire and Sherpa) found in the Fabric and Finish Guide can be used on these chairs but will be viewed as a COM situation.

These chairs are ONLY available in Bretford's Natural Maple finish.

STACKING CHAIRS

PRODUCT	MODEL #	DESCRIPTION	SEAT HEIGHT
	LHCLO16-__	Stacking Chair - 19"W x 19"D x 30 ¹ / ₂ "H	16"
	LHCLO18-__	Stacking Chair - 19"W x 19"D x 32 ¹ / ₂ "H	18"

Bretford's Stacking Chairs come in two sizes to provide seating in youth and adult areas. Adult height chairs are available in Natural Maple or Two-Tone (Medium Cherry and Black). Youth chairs are only available in Natural Maple.

HOW TO ORDER LIBRARY CHAIRS:

Example: Basic Four-Leg Chair; Natural Maple Finish; Iota Bonsai Fabric

TECHNOLOGY FURNITURE

Bretford's Technology Furniture is essential for today's modern libraries.

- Technology Furniture accommodates computers and peripherals and enables patrons to use electronic equipment such as laptops and modems.
- Technology Carrels offer the privacy needed when working alone and the ability to interact electronically through power and data sources.
- Both Technology Tables and Carrels feature solutions for power and data management, enabling these options to be linked continuously throughout all Technology Furniture pieces.
- Tables and carrels are designed with the same aesthetics and durability as all other Legacy Furniture.

HOW TO ORDER TECHNOLOGY FURNITURE FOR YOUR LEGACY LIBRARY

The increase of on-line data services, interactive multimedia, and laptop computers has produced a need for additional and available access to computer workstations in the library. Bretford supports this growth of technology with Legacy Technology Tables and Technology Carrels. Technology Tables and Carrels are designed to facilitate the technology of today as well as provide flexibility for the future.

THE FOLLOWING PAGES DESCRIBE HOW TO ORDER YOUR TECHNOLOGY TABLES AND TECHNOLOGY CARRELS.

Technology Carrel

Technology Table

TECHNOLOGY CARRELS

Technology Carrels combine the Legacy starter/add-on concept to enable space saving configurations with the best solutions for power and data management.

- Carrels are available in two different styles, Computer Workstations and Patron Access Stations, for optimum patron use.
- Top-down access to wires makes management of cords simple.
- Wire management tray features independent raceways for power and data for Category 5 requirements.
- Power access doors are lockable for security and have grommets for easy organization.
- Carrels are available with three fully integrated power options (see page 160).
- Single- and double-faced units allow for stand alone or clustering of stations.
- Carrel design is consistent with all other Legacy pieces for an integrated look.
- Carrels are designed to facilitate the technology of today as well as provide flexibility for the future.

SPECIFICATION INFORMATION

TECHNOLOGY CARRELS

Legacy Technology Carrels provide a variety of solutions for access and organization of power and data. Each carrel is equipped with a power access door (72" and 96" wide carrels have two doors). Each power access door includes two grommet holes and a flush mounted brass key lock located in the center for security. Each carrel is equipped with a 20-gauge steel wire management tray mounted directly below the power access door(s). The wire tray is separated into two channels, one for power and one for data. This isolation helps eliminate any electromagnetic interference between power and data cables. Also included in the wire management tray are generic face plates that will accommodate most data jacks.

Legacy Technology Carrels are available in both starter and add-on units in order to easily construct any length range. The Technology Carrels are also offered in single- and double-faced configurations.

Upright Panels:

Legacy upright panels are constructed of 1" thick, 45 lb. density industrial grade particle board covered on both sides with A-grade plain sliced and book matched wood veneer. Bull-nosed edge treatments are constructed using solid hardwood, FAS select or better. Single-faced panels have a $\frac{9}{16}$ " radius front top corner and 90 degree back top corner to fit flush against a wall. Double-faced units have a $\frac{9}{16}$ " radius front and back.

Each middle panel shall have a $3\frac{1}{2}$ " x $3\frac{7}{8}$ " wide cutout for cord pass through with an integrated cable separator to help keep data and power separated.

All upright panels have a UV cured finish. Each panel has 1" leg leveling glides that screw into pre-threaded metal inserts.

Carrels are available in the following heights:

- Juvenile (J) is 33"H
- Youth (Y) is 34"H
- Adult (A) is 37"H
- Wheelchair (W) is 40"H
- Stand-up (P) is 47"H

Measurements for 36"W Carrels:

- Each starter unit including hardware measures $37\frac{3}{32}$ "W and add-on unit including hardware measures $36\frac{1}{32}$ "W.

Measurements for 48"W Carrels:

- Each starter unit including hardware measures $49\frac{3}{32}$ "W and add-on unit including hardware measures $48\frac{1}{32}$ "W.

Measurements for 60"W Carrels:

- Each starter unit including hardware measures $61\frac{3}{32}$ "W and add-on unit including hardware measures $60\frac{1}{32}$ "W.

Measurements for 72"W Carrels:

- Each starter unit including hardware measures $73\frac{3}{32}$ "W and add-on unit including hardware measures $72\frac{1}{32}$ "W.

Measurements for 96"W Carrels:

- Each starter unit including hardware measures $97\frac{3}{32}$ "W and add-on unit including hardware measures $96\frac{1}{32}$ "W.

Back Panels:

Back Panels are constructed of 1" thick, 45 lb. density industrial grade particle board on both sides with A-grade plain sliced and book matched wood veneer and a solid $\frac{3}{8}$ " thick, hardwood edge treatment.

Work Surfaces:

Carrel top is $1\frac{1}{4}$ " thick, 45 lb. density industrial grade particle board covered with .050" thick horizontal grade high-pressure laminate surface with a solid hardwood edge.

Top Dimensions:

- 36"W x 30"D Carrel: $27\frac{3}{4}$ "D x 35"W
- 36"W x 36"D Carrel: $33\frac{3}{4}$ "D x 35"W
- 48"W x 30"D Carrel: $27\frac{3}{4}$ "D x 47"W
- 48"W x 36"D Carrel: $33\frac{3}{4}$ "D x 47"W
- 60"W x 30"D Carrel: $27\frac{3}{4}$ "D x 59"W
- 60"W x 36"D Carrel: $33\frac{3}{4}$ "D x 59"W
- 72"W x 30"D Carrel: $27\frac{3}{4}$ "D x 71"W
- 72"W x 36"D Carrel: $33\frac{3}{4}$ "D x 71"W
- 96"W x 30"D Carrel: $27\frac{3}{4}$ "D x 95"W
- 96"W x 36"D Carrel: $33\frac{3}{4}$ "D x 95"W

Worksurface Heights:

Carrels are available in the following worksurface heights:

- Juvenile (J) is 25"H
- Youth (Y) is 26 $\frac{1}{2}$ "H
- Adult (A) is 29"H
- Wheelchair (W) is 32"H
- Stand-up (P) is 39"H

Power Access Doors:

Each Door shares the same construction specifications and as the carrel work surface. Each door is equipped with two grommet holes and a flush mounted brass key lock. Door configurations vary depending on the size and shape of your carrel. Each door is keyed alike. Doors are placed $3\frac{3}{8}$ " from the back of the work surface.

Dimensions: $5\frac{3}{8}$ "D x $23\frac{7}{8}$ "W

Wire Management Tray:

Constructed from 20-gauge steel and finished in durable powder paint. Each tray is equipped with two end caps and data face plates which mount on a steel partition that helps separate power and data. The tray length varies with the overall length of the carrel.

Dimensions: 6"D x 6"W

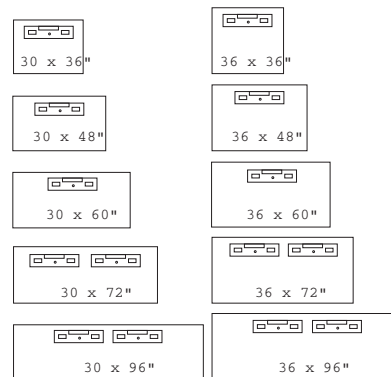

Linking Technology Carrels:

Technology Carrels must be at the same height to link any electrical or data wiring together from carrel to carrel.

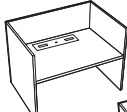

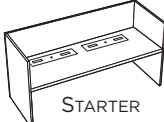

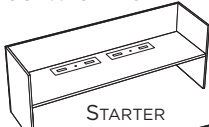

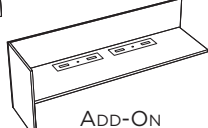

Electrical and Data Options found on page 150-157.

Technology Carrel Sizes

TIP: Legacy Library furniture comes in a variety of paint finishes, laminates and veneers. See page 7 for options.

Bretford's Technology Carrels offer a variety of ways to accommodate computers and peripherals in your library. From youth stations to patron access, select from five work surface heights. Panels extend 8" above the work surface.

For Electrical and Data Options, see pages 150-157.

TECHNOLOGY CARREL: POWER OPTIONS

The Legacy Technology Carrels offer three integrated electrical solutions. This variety allows you to select the power option that best suits your application.

- Softwire Solution - Four-outlet surge protected power strip with a 20' cord.
- PowerHouse™ - Table-top power and data assembly with either a 6' or a 20' cord.
- Hardwire System - 8-wire, 4-circuit hardwire system with quick disconnect components for easy installation and reconfiguring which allows carrel-to-carrel linking of electrical system.

SPECIFICATION INFORMATION

SOFTWARE SOLUTION

Surge Protected Power Strip:

Four-outlet surge protected power strip has one circuit capability and is equipped with a 20' electrical cord. Unit has an on/off switch for single-switch control. UL Listed. For safe operation, power strip can wire individual carrels but cannot be linked carrel-to-carrel.

PowerHouse™:

The best way to bring power and data to the work surface. This surface mounted power and data unit secures into the grommet hole of any Bretford carrel. Each PowerHouse comes with two surge protected electrical outlets and a plate for two voice/data ports. Face plates accommodate two data jacks using Amp, Inc. Series 110 Connect System. Constructed from steel and painted in black environmentally-safe powder paint. Model PWRHSE-20 comes standard with a 20' grounded electrical cord (120 volt). Model PWRHSE-6 comes with a 6' cord. If you require that the PowerHouse be UL approved, please specify PWR06-LL and PWR20-LL.

For information, please contact the Amp Information Center at 1-800-522-6752.

HARDWARE SYSTEM

Bretford's 8-wire, 4-circuit hardwire system must be installed by a licensed electrician. All components are UL Listed and manufactured in accordance with National Electric Code requirements.

Please note: Technology Carrels must be the same height to link together with this system. Hardwire system components include the following:

Power Harness Pack:

Attaches to the inside of the wire management bin and distributes electrical power to the receptacles.

Duplex Receptacles:

Bretford's 8-wire, 4-circuit system uses Duplex receptacles (each duplex has two electrical outlets) to determine from which circuit the electrical equipment will draw power. The receptacles are marked 1, 2, 3 or 4 to designate the circuit that is activated when it is installed into the Power Harness. Each circuit has 20 amp capability. Circuits 1, 2 and 3 all share a common ground while circuit 4 has a separate ground and a neutral wire. This makes Circuit 4 perfect for more sensitive equipment like printers and network servers. Typically, personal computers and displays are connected to circuits 1, 2 or 3. Specify two duplex receptacles for every one Power Harness.

Simplex Receptacles:

Any Duplex Receptacle can be replaced with a surge protected simplex. The simplex is the only outlet that is surge protected on the circuit.

Power Feed:

12'L cable with leg chase housing provides a safe and attractive way to bring power from the floor to the wire management bin. Includes a 12'L 8-wire, 4-circuit cable and one leg chase. Power feed must be installed by a licensed electrician, and must be specified according to height of table. Finished in powder paint.

Power Jumper:

Connects Power Harnesses from table to table. Available in a variety of sizes to best match the table sizes being placed next to each other in order to connect the power harnesses in each carrel.

CARREL ACCESSORIES

Leg Chase:

Unit attaches to the inside panel of the Technology Carrel. Two sections inside the leg chase keep power and data cables separated to deter any electromagnetic interference. Leg Chase must be specified according to height of table. Finished in durable powder paint.

CPU Holder for attachment to side panel:

Unit attaches to either the left or right side on the outside of the carrel panel. Adjustable to accommodate up to 10"W CPUs. Finished in durable powder paint.

Dimensions: 5"-10"W x 17"D x 10"H

CPU Holder for attachment to underside of worksurface:

Unit attaches to the underside of the carrel work surface. Accommodates various CPU sizes. Finished in durable powder paint.

Dimensions: 6 1/2"-11 1/2"W x 20 3/8"H

TIP: Legacy Library furniture comes in a variety of paint finishes, laminates and veneers. See page 7 for options.

ORDERING POWER OPTIONS

Most people are intimidated or nervous when dealing with electrical issues. This step-by-step guide is for people who may not be familiar with electrical systems, but are responsible for specifying such systems when ordering furniture. It provides a basic understanding of an 8-wire, 4-circuit (20 amp per circuit) system and how to specify it. By following the simple steps outlined here, one can easily determine how many circuits are required to ensure safety when using electrical equipment.

The Bretford Technology Carrels featured in this guide have separate raceways for voice and data wires and meet Category 5 Performance Requirements. Data receptacles on Bretford tables utilize the Amp, Inc. 110 Connect Series jacks. For a list of Amp distributors in your area, call the Amp Information Center at 1-800-522-6752.

Electrical components are UL-Listed and manufactured in accordance with National Electric Code requirements. Certain cities and municipalities may have additional requirements.

STEP 1

Figure out how many amps you will be running.

An amp is a unit of measure that tells how much electricity a machine is drawing from an electrical system. On your computer or electrical device, locate the faceplate that describes the machine's technical features. The amps are usually displayed like this: INPUT: 120 V ~ 1.8 A. If you cannot find this information on the machine, it may be located in the owner's manual.

STEP 2

Calculate the total number of amps per powered series.

A powered series is the total number of amps from which you are drawing power off of one power feed. In our case, it could be a row of carrels joined together with many power receptacles. Add up the number of amps (determined in STEP 1) for each machine being powered off the series. In our example, we've used an estimate of 3 amps for each computer and monitor. Please note that all equipment is different and will vary by machine.

STEP 3

Divide by 16.

Although each circuit is rated for 20 amps of intermittent use, most computers and machinery in an office environment are used continually for many hours. In this type of situation, the National Electric Code restricts the circuits to 16 amps of continuous use. So, divide the sum of the amps (determined in STEP 2) by 16.

STEP 4

This is the number of circuits your power series requires.

In most cases, this number is a decimal. Round up to the next whole number, which is the number of circuits required to run your equipment safely. If the number you arrived at is greater than 4 (the most amount of circuits the system will handle), you will have to decrease some of the power being used on this system or create another system with a new power feed.

STEP 5

Repeat Steps 1-4 for each remaining powered series.

This would apply if you have multiple rows of Technology Carrels and/or Tables. Remember, you must go through this process for each system that runs off its own power feed.

Now that we know how many circuits each powered series will need, let's see how it applies to different types of Bretford Technology Carrels.

Bretford's 8-wire, 4-circuit system uses Duplex receptacles (each duplex has two power outlets) to determine from which circuit the electrical equipment will draw power. The receptacles are marked 1, 2, 3, or 4 to designate the circuit that is activated when it is installed into the PowerHarness. Circuits 1, 2, and 3 all share a common ground while circuit 4 has a separate ground of its own and a neutral wire. This makes Circuit 4 perfect for more sensitive equipment like printers and powerful computers.

If your system requires 2 circuits, specify Duplexes 1 and 2 along the entire system to access those specific circuits. Here is an example of what a 2-circuit single-faced carrel system will require:

- (1) 36"W Single-Faced Technology Carrel Starter
- (1) 36"W Single-Faced Technology Carrel Add-On
- (2) 36"W PowerHarness Pack
- (2) Duplex Circuit 1
- (2) Duplex Circuit 2
- (1) Hardwire Power Feed

"HARDWIRE SYSTEMS
MUST BE INSTALLED BY
A LICENSED ELECTRICIAN"

Here is an example of what a 4-circuit double-faced carrel system will require:

- (1) 36"W Double-Faced Technology Carrel Starter
- (3) 36"W Double-Faced Technology Carrel Add-On
- (8) 36"W PowerHarness Pack
- (4) Duplex Circuit 1
- (4) Duplex Circuit 2
- (4) Duplex Circuit 3
- (4) Duplex Circuit 4
- (6) Jumpers
- (2) Hardwire Power Feeds

Reminder:

All powered carrels come standard equipped with data and communication support raceways. Bretford does not offer data jacks. Therefore, they must be purchased separately.

Meets Category 5 Requirements.

ORDERING POWER OPTIONS: HARDWARE

Electrical Applications: Model Numbers for all of these products are on the following two pages. For heavy power usage, which require multiple circuits, specify the hardwire power system.

NOTE: Must be installed by a licensed electrician.

Example of Legacy Carrel Order Code:

LSTCC 30 36 A S OK2

Model Number Depth Width Height Starter or Add-on Wood Finish

HEIGHTS:

J = Juvenile - 25"H
Y = Youth - 26 1/2"H
A = Adult - 29"H
W = Wheelchair - 32"H
P = Standup - 39"H

STEP 1 Specify Technology Carrel (pages 156-159)

(designated by grey shaded area on picture)

- Choose the size, height and finish for the Technology Carrel.
- Each Technology Carrel has a wire management tray mounted directly beneath the lockable power door(s).
- Be sure to specify either starter or add-on for every carrel.

Please note: Carrels must be same height to be linked.

PowerHarness Order Code:

LSTCC3036AS - OK2
LHRNPK 364860

PowerHarness Width

STEP 2 Specify PowerHarness Pack (page 167)

(designated by grey shaded area on picture)

- PowerHarness pack should be specified according to width of Technology Carrel ordered.
- Specify Model LHRNPK364860 for 36", 48" and 60"W carrels.
- Specify Model LHRNPK7296 for 72"W or 96"W carrels.
- One PowerHarness pack is required per Technology Carrel.
- Includes one harness per power door, and a jumper for carrels with two power doors.

Duplex Order Code:

LSTCC3036AS - O K2
LHRNPK364860
(2) DUPLC _ _

Model Number

SIMPLEX Order Code:

SIMP _ _

Model Number

(2) Duplexes

Duplex and Simplex with Surge Protector

STEP 3 Specify Receptacle (page 167)

(designated by grey shaded area on picture)

- Choose two receptacles per PowerHarness.
- See pages 152-153 for information on ordering circuits.

Power Feed Order Code:

LSTCC3036AS - 0K2

LHRNPK364860

(2) DUPLC_ _

LHDWR A -

Model Number Height Finish

STEP 4

Specify the Power Feed (page 167)

(designated by grey shaded area on picture)

- Specify the power feed based upon the height of the carrel.
- One power feed is required per run of carrels, two power feeds per run of double-faced carrels.
- Power feed includes a leg chase that separates power and data wiring.

Please note: Each power feed must be installed by a licensed electrician.

Power Jumper Order Code:

LSTCC3036AS - 0K2

LHRNPK364860

(2) DUPLC_ _

LHDWRA-

LJUMP

Model Number

36

Width of carrel

36

Width of carrel

Step 5

Specify Power Jumpers to connect Carrels (page 166)

(designated by grey shaded area on picture)

- Specify one power jumper between each set of connecting carrels.
- The unit connects power between all Technology Carrels.
- See page 156 for information on ordering Power Jumpers.

TIP: To link carrels with hardware components, all work surfaces must be the same height.

ORDERING POWER OPTIONS: CIRCUITS

TIP: Use the diagrams below to determine which jumper size is needed.

Example: To connect two 48"W Technology Carrels, model LJUMP4848 should be specified. To connect a 36"W and a 72"W Technology Carrel, model LJUMP3672 should be specified.

Examples:

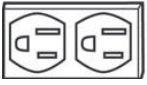

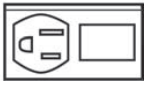

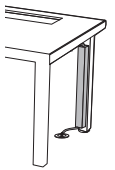

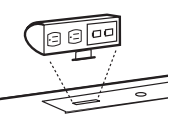

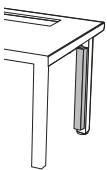

CONNECTS
THESE CARREL
SIZES

PRODUCT	MODEL #	DESCRIPTION	CONNECTS THESE CARREL SIZES
	POWER JUMPERS		
	LJUMP3636	25½" long	36"W Carrel with 36"W Carrel
	LJUMP3648	31½" long	36"W Carrel with 48"W Carrel
	LJUMP3660	37½" long	36"W Carrel with 60"W Carrel
	LJUMP3672	28½" long	36"W Carrel with 72"W Carrel
	LJUMP3696	40½" long	36"W Carrel with 96"W Carrel
	LJUMP4848	37½" long	48"W Carrel with 48"W Carrel
	LJUMP4860	43½" long	48"W Carrel with 60"W Carrel
	LJUMP4872	34½" long	48"W Carrel with 72"W Carrel
	LJUMP4896	46½" long	48"W Carrel with 96"W Carrel
	LJUMP6060	49½" long	60"W Carrel with 60"W Carrel
	LJUMP6072	40½" long	60"W Carrel with 72"W Carrel
	LJUMP6096	52½" long	60"W Carrel with 96"W Carrel
	LJUMP7272	31½" long	72"W Carrel with 72"W Carrel
	LJUMP7296	43½" long	72"W Carrel with 96"W Carrel
	LJUMP9696	55½" long	96"W Carrel with 96"W Carrel

Power Jumpers are designed to chain power from one table to another when sitting side by side. Since the combination of table sizes sitting next to one another can vary, Bretford offers a variety of power jumpers that will allow every possible combination of tables to be connected to each other.

Bretford offers three ways to add power to your table. The first is hardwiring your carrels. See pages 164-165 on what items you need to power your tables this way.

*** Hardwire option requires installation by a licensed electrician.**

Bretford also offers two soft-wire options. The first is the Surge-Protect Power Strip with four power outlets.

The second soft-wire option is the Power House which provides not only power but room for data jacks as well.

The Leg Chase can be used with either the Power Strip or the Power House. It provides a cord drop to the floor.

There are two CPU options; one attaches to the carrel side panel while the other attaches to the underside of the worksurface.

TECHNOLOGY TABLES

The Legacy Technology Table not only provides the beauty and durability of a Bretford product but also has the technology for today and the flexibility for the future.

- Top-down access to wires makes cord management simple.
- Lockable power access doors have grommets for easy cord management.
- Technology Tables have three fully integrated power options.
- Wire management tray features independent raceways for power and data.
- Table design is consistent with all other Legacy pieces for an integrated look.
- All electrical options feature quick disconnect capabilities for ease of setting up and reconfiguring tables.

SPECIFICATION INFORMATION

Technology Tables

Technology Tables provide a variety of solutions for access and organization of power and data. Each table is equipped with a power access door (larger tables have two doors). Each power access door includes two grommet holes and a flush mounted brass key lock located in the center for security. Each table is equipped with a 20-gauge steel wire management tray mounted directly below the power access door(s). The wire tray is separated into two channels, one for power and one for data. This isolation helps eliminate any electromagnetic interference between power and data tables. Also included in the wire management tray are generic face plates that will accommodate any data jack.

Legs and edge treatments are made of hardwood with rounded edges which create a smooth, finished look. Worksurfaces are finished in a durable laminate that will provide years of use.

Table Tops:

Each table top is constructed of 1/4" thick, three-ply, industrial grade particle board covered with a .050" thick high pressure laminate with .024" thick backer. Edge treatments are 1/16" thick solid hardwood, FAS select or better, that is kiln dried to a moisture content of less than 7%. Each top has a 3/4" x 1 3/8" solid wood support rail that spans between each leg assembly.

Table Top Support:

All table tops 60" or longer are supported with a 14-gauge steel square keel. All table tops 90" long and/or 48" wide have two 14-gauge steel square keels running in parallel.

Worksurface Heights:

Tables are available in the following worksurface heights:

- Juvenile (J) is 25"H
- Youth (Y) is 26 1/2"H
- Adult (A) is 29"H
- Wheelchair (W) is 32"H
- Standup (P) is 39"H.

Leg Construction:

Legs are 2 1/4" square glued-up solid hardwood, FAS select and better.

Leg Assembly:

Legs are attached using a 5" square x 5/16" thick steel plate. The leg is attached by two 5/16" x 3" machine bolts that screw into a double 5/16", 18 barrel nut embedded into the leg. The steel plate is attached to the table top using five, 5/16" - 18 x 1 1/4" hex head machine bolts that screw into pre-threaded metal inserts.

Leg Leveling Glides:

Each leg has a 1 3/4" diameter x 1/2" long leg leveling glide that screws into a pre-threaded metal insert.

Power Access Doors:

Each door shares the same construction specifications and the same finish as the table top. Each door is equipped with two grommet holes and a flush mounted brass key lock. Door configurations vary depending on the size and shape of your table. All tables are keyed alike.

Dimensions: 23"D x 5"W

Wire Management Tray:

Constructed from 20-gauge steel and finished in smooth, powder paint. Each tray is equipped with data face plates which mount on a steel partition to help separate power and data. The tray length varies with the overall length of the table.

Dimensions: 4 1/2"D x 6"W

Linking Technology Tables:

Keep in mind that Technology Tables must be at the same height to link any electrical or data wiring together from table to table.

End Caps:

Each run of tables will require one set of end caps, sold separately.

Bridge Pack:

Includes bridge and ganging plate. Bridge Pack is required in between each set of connecting tables. Bridge Pack sold separately.

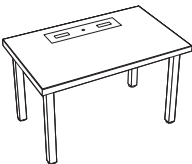

Electrical and Data Options found on page 172-179.

Technology Table Sizes

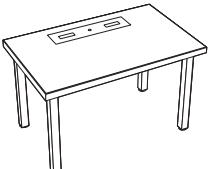

TIP: Legacy Library furniture comes in a variety of paint finishes, laminates and veneers. See page 7 for options.

Bretford's Technology Tables offer a variety of ways to accommodate computers and peripherals in your library. From youth to stand-up height, select from five work surface heights.

For Electrical and Data Options, see pages 172-179.

TECHNOLOGY TABLE: POWER OPTIONS

The Legacy Technology Tables offer three integrated electrical solutions. This variety allows you to select the power option that best suits your application.

- Softwire Solution - Four-outlet surge protected power strip with a 20' cord.
- PowerHouse™ - Table-top power and data assembly with either a 6' or a 20' cord.
- Hardwire System - 8-wire, 4-circuit hardwire system with quick disconnect components for easy installation and reconfiguring which allows carrel-to-carrel linking of electrical system.

SPECIFICATION INFORMATION

SOFTWARE SOLUTION

Surge Protected Power Strip:

Four-outlet surge protected power strip has one circuit capability and is equipped with a 20' electrical cord. Unit has an on/off switch for single-switch control. UL-Listed. For safe operation, units can wire individual carrels but cannot be linked table-to-table.

PowerHouse™:

The best way to bring power and data to the work surface. This surface mounted power and data unit locks into the grommet hole of any Bretford table. Each PowerHouse comes with two surge protected electrical outlets and a plate for two voice/data ports. Face plates accommodate two data jacks using Amp, Inc. Series 110 Connect System. Constructed from steel and painted in environmentally-safe black powder paint. Model PWRHSE-20 comes standard with a 20' grounded electrical cord (120 volt). Model PWRHSE-6 comes with a 6' cord. If you require that the PowerHouse be UL approved, please specify PWR06-LL and PWR20-LL.

For information, please contact the Amp Information Center at 1-800-522-6752.

HARDWARE SYSTEM

Bretford's 8-wire, 4-circuit hardware system must be installed by a licensed electrician. All components are UL-listed and manufactured in accordance with National Electric Code requirements. **Please note:** Technology Tables must be the same height to link together with this system. Hardware system components include the following:

Power Harness Pack:

Attaches to the inside of the wire management bin and distributes electrical power to the receptacles.

Duplex Receptacles:

Bretford's 8-wire, 4-circuit system uses Duplex receptacles (each duplex has two electrical outlets) to determine from which circuit the electrical equipment will draw power. The receptacles are marked 1, 2, 3 or 4 to designate the circuit that is activated when it is installed into the PowerHarness. Each circuit has 20 amp capability. Circuits 1, 2 and 3 all share a common ground while circuit 4 has a separate ground and a neutral wire. This makes Circuit 4 perfect for more sensitive equipment like printers and network servers. Typically, personal computers and displays are connected to circuits 1, 2 or 3. Specify two duplex receptacles for every one PowerHarness.

Simplex Receptacles:

Any Duplex Receptacle (see above) can be replaced with a surge protected simplex. The simplex is the only outlet that is protected on the circuit.

Power Feed:

12'L cable with leg chase housing provides a safe and attractive way to bring power from the floor to the wire management bin. Includes a 12'L 8-wire, 4-circuit cable and one leg chase. Power feed must be installed by a licensed electrician, and must be specified according to height of table.

Power Jumper:

Connects Power Harnesses from table to table. Available in a variety of sizes to best match the table sizes being placed next to each other in order to connect the power harnesses in each carrel.

TABLE ACCESSORIES

Leg Chase:

Unit attaches to the inside of a leg of the Technology Table. Two sections within the leg chase keep power and data cables separated to deter any electromagnetic interference. Leg Chase must be specified according to height of table.

Bridge Pack:

Includes one bridge that connects the wire management bin from table to table and two ganging plates to connect Technology Tables together. Sold separately.

End Caps:

Includes two End Caps for wire management tray, sold separately. Use one set for each run of connected Technology Tables.

CPU Holder for attachment to underside of worksurface:

Unit attaches to the underside of the carrel work surface. Accommodates various CPU sizes. Finished in durable powder paint.

Dimensions: 6 $\frac{1}{2}$ "-11 $\frac{1}{2}$ "W x 20 $\frac{3}{8}$ "H

TIP: Legacy Library furniture comes in a variety of paint finishes, laminates and veneers. See page 4 for options.

ORDERING POWER OPTIONS

Most people are intimidated or nervous when dealing with electrical issues. This step-by-step guide is for people who may not be familiar with electrical systems, but are responsible for specifying such systems when ordering furniture. It provides a basic understanding of an 8-wire, 4-circuit (20 amp per circuit) system and how to specify it. By following the simple steps outlined here, one can easily determine how many circuits are required to ensure safety when using electrical equipment.

The Bretford Technology Tables featured in this guide have [separate raceways for voice and data wires and meet Category 5 Performance Requirements](#). Data receptacles on Bretford tables utilize the Amp, Inc. 110 Connect Series jacks. For a list of Amp distributors in your area, call the Amp Information Center at 1-800-522-6752.

Electrical components are UL-Listed and manufactured in accordance with National Electric Code requirements. Certain cities and municipalities may have additional requirements.

STEP 1

Figure out how many amps you will be running.

An amp is a unit of measure that tells how much electricity a machine is drawing from an electrical system. On your computer or electrical device, locate the faceplate that describes the machine's technical features. The amps are usually displayed like this: INPUT: 120 V ~ 1.8 A. If you cannot find this information on the machine, it may be located in the owner's manual.

STEP 2

Calculate the total number of amps per powered series.

A powered series is the total number of amps from which you are drawing power off of one power feed. In our case, it could be a row of tables joined together with many power receptacles. Add up the number of amps (determined in STEP 1) for each machine being powered off the series. In our example, we've used an estimate of 3 amps for each computer. Please note that all equipment is different and will vary by machine.

STEP 3

Divide by 16.

Although each circuit is rated for 20 amps of intermittent use, most computers and machinery in an office environment are used continually for many hours. In this type of situation, the National Electric Code restricts the circuits to 16 amps of continuous use. So, divide the sum of the amps (determined in STEP 2) by 16.

STEP 4

This is the number of circuits your power series requires.

In most cases, this number is a decimal. Round up to the next whole number, which is the number of circuits required to run your equipment safely. If the number you arrived at is greater than 4 (the most amount of circuits the system will handle), you will have to decrease some of the power being used on this system or create another system with a new power feed.

STEP 5

Repeat Steps 1-4 for each remaining powered series.

This would apply if you have multiple rows of Technology Tables. Remember, you must go through this process for each system that runs off its own power feed.

Now that we know how many circuits each powered series will need, let's see how it applies to different types of Bretford Technology Tables.

Bretford's 8-wire, 4-circuit system uses Duplex receptacles (each duplex has two power outlets) to determine from which circuit the electrical equipment will draw power. The receptacles are marked 1, 2, 3, or 4 to designate the circuit that is activated when it is installed into the power harness. Circuits 1, 2, and 3 all share a common ground while circuit 4 has a separate ground of its own and a neutral wire. This makes Circuit 4 perfect for more sensitive equipment like printers and powerful computers.

If your system requires 2 circuits, specify Duplexes 1 and 2 along the entire system to access those specific circuits. Here is an example of what a 2-circuit system will require:

- (2) 30"D x 72"W Technology Tables
- (2) 72"W Power Harness Pack
- (4) Duplex Circuit 1
- (4) Duplex Circuit 2
- (1) Jumper
- (1) Hardwire Power Feed

Here is an example of what a 4-circuit (shown below) system will require:

- (4) 30"D x 72"W Technology Tables
- (4) 72"W Power Harness Pack
- (4) Duplex Circuit 1
- (4) Duplex Circuit 2
- (4) Duplex Circuit 3
- (4) Duplex Circuit 4
- (3) Jumpers
- (1) Hardwire Power Feed

Reminder:

All powered tables come standard equipped with data and communication support raceways. Bretford does not offer data jacks. Therefore, they must be purchased separately.

Meets Category 5 Requirements.

ORDERING POWER OPTIONS: HARDWARE

Electrical Applications: Model Numbers for all of these products are on the following two pages. For heavy power usage, which require multiple circuits, specify the hardwire power system.

NOTE: Must be installed by a licensed electrician.

Example of Legacy Table Order Code:

LXTCT 36 72 A 0 K 2
Technology Table Depth Width Height Wood Finish

HEIGHTS:

J = Juvenile - 25"H
 Y = Youth - 26½"H
 A = Adult - 29"H
 W = Wheelchair - 32"H
 P = Standup - 39"H

STEP 1

Specify Technology Table (pages 168-171)

(designated by grey shaded area on picture)

- Choose the size, height and finish for the Technology Table.
- Each Technology Table has a wire management tray mounted directly beneath the lockable power door(s).
- Be sure to specify either starter or add-on for every carrel.

Please note: Tables must be same height to be linked.

Power Harness Order Code:

LXTXT 36 72 A OK2
 LHRNPK 7296
Power Harness Width

STEP 2

Specify PowerHarness Pack (page 178)

(designated by grey shaded area on picture)

- PowerHarness pack should be specified according to width of Technology Carrel ordered.
- Specify Model LHRNPK364860 for 36", 48" and 60"W tables.
- Specify Model LHRNPK7296 for 72"W or 96"W tables.
- One PowerHarness pack is required per Technology Table.
- Includes one harness per power door, and a jumper for tables with two power doors.

(2) Duplexes

Duplex and Simplex with Surge Protector

Duplex Order Code:

LXTXT 36 72 A OK2
 LHRNPK7296
 (4) DUPL C _ _
Model Number

Duplex and Surge Order Code:

SIMPL _ _
Model Number

STEP 3

Specify Receptacle (page 179)

(designated by grey shaded area on picture)

- Choose two receptacles per PowerHarness.
- See pages 164-165 for information on ordering circuits.

Power Feed Order Code:

LXTXT 36 72 A OK2

LHRNPK7296

(4) DUPLC_ _

LHDWR A - _

Model Number

Height

Finish

STEP 4

Specify the Power Feed (page 179)

(designated by grey shaded area on picture)

- Specify the power feed based upon the height of the table.
- One power feed is required per run of tables.
- Power feed includes a leg chase that separates power and data wiring.

Please note: Each power feed must be installed by a licensed electrician.

Power Jumper Order Code:

LXTXT 36 72 A OK2

LHRNPK7296

(4) DUPLC_ _

LHDWRA - _

LJUMP

Model Number

72

Width of table

72

Width of table

TIP: To link tables, all work surfaces must be the same height.

Step 5

Specify Power Jumpers to connect Tables (page 178)

(designated by grey shaded area on picture)

- Specify one power jumper between each set of connecting carrels.
- The unit connects power between all Technology Tables.
- See page 168 for information on ordering Power Jumpers.

End Cap and Bridge Pack Order Codes:

LXTXT 36 72 A OK2

LHRNPK7296

(4) DUPLC_ _

LHDWRA - _

LJUMP7272

LENCAP

End Cap Model Number

LBRIDGE

Bridge Pack Model Number

Step 6

Specify End Caps and Bridge Pack (page 179)

- Specify one set of end caps per run of tables.
- Specify one Bridge Pack for each table-to-table connection.

ORDERING POWER OPTIONS: CIRCUITS

TIP: Use the diagrams below to determine which jumper size is needed.

Example: To connect two 48"W Technology Tables, model LJUMP4848 should be specified. To connect a 36"W and a 72"W Technology Table, model LJUMP3672 should be specified.

Examples:

PRODUCT	MODEL #	DESCRIPTION	CONNECTS
			THESE TABLE SIZES
	POWER JUMPERS		
	LJUMP4848	37½" long	48"W Table with 48"W Table
	LJUMP4860	43½" long	48"W Table with 60"W Table
	LJUMP4872	34½" long	48"W Table with 72"W Table
	LJUMP4896	46½" long	48"W Table with 96"W Table
	LJUMP6060	49½" long	60"W Table with 60"W Table
	LJUMP6072	40½" long	60"W Table with 72"W Table
	LJUMP6096	52½" long	60"W Table with 96"W Table
	LJUMP7272	31½" long	72"W Table with 72"W Table
	LJUMP7296	43½" long	72"W Table with 96"W Table
	LJUMP9696	55½" long	96"W Table with 96"W Table

Power Jumpers are designed to chain power from one table to another when sitting side by side. Since the combination of table sizes sitting next to one another can vary, Bretford offers a variety of power jumpers that will allow every possible combination of tables to be connected to each other.

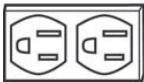

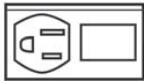

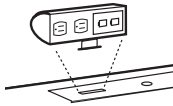

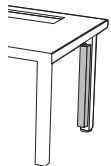

The Power Harness attaches to the inside of the wire management bin and distributes electrical power to the receptacles.

POWER HARNESS

- LHRNPK364860 PowerHarness Pack for 36", 48" and 60"W
Contains one harness
- LHRNPK7296 PowerHarness Pack for 72" and 96"W
Contains two harnesses and one jumper

CPU HOLDER		
	QWTCPU-__	Adjustable CPU Holder - Attaches to underside of work surface

Bretford offers three ways to add power to your table. The first is hardwiring your tables. See pages 172-175 on what items you need to power your tables this way.

*** Hardwire option requires installation by a licensed electrician.**

Bretford also offers two softwire optional. The first is the Surge-Protect Power Strip with four power outlets.

The second soft-wire option is the Power House which provides not only power but data jacks as well.

The CPU Holder option attaches to the underside of the worksurface.

CIRCULATION, LIBRARIAN & INFORMATION STATION DESKS

With the Legacy Library System, you can create a custom circulation desk that fulfills your specific space and utility needs.

- Hundreds of combinations are possible when you design your desk from Bretford's variety of standard components.
- Matching, individual components can be configured into circulation desks, reference desks, checkout stations and information stations.
- All units are 36" deep to accommodate today's computerized library.
- Follow the starter/add-on philosophy to increase your options.
- Available with optional cord management bins and book drops.
- Can be constructed to comply with ADA Requirements.
- All components can be modified to accommodate your special needs.
- See pages 182-183 for sample circulation desk drawings.

SPECIFICATION INFORMATION

CIRCULATION DESKS

Upright Panels:

The upright panels are used as a structural transition between selected work surfaces. Only one panel is required between work surfaces. Each panel is constructed of 1" thick, 45 lb. density, industrial grade particle board covered on both sides with A-grade plain sliced and book matched wood veneer. Edge treatments are constructed using 3/8" thick, solid hardwood, FAS select or better, with a 9/16" corner radius. All hardwood pieces are kiln dried to a moisture content of less than 7%. All upright panels have a UV cured finish. Panels are custom drilled to accept the selected work surface, no additional holes are permitted. Each panel has 1/8" diameter x 1 1/2" long swivel leg leveling glides that screw into pre-threaded metal inserts.

Front Panels:

In order to insure all of the front panels have consistent grains and cathedrals when ordering maple, front panels are constructed using architectural grade, sequence matched plain sliced and book matched wood veneer laid up on industrial grade, 1" thick, 45 lb. density particle board. Oak and cherry front panels are constructed using reconstituted veneer. A 3/4" high toe kick is finished in powder paint inset into the bottom of the front panel. All front panels are recessed 5" underneath work surfaces or transaction counters for patron toe space.

Work Surfaces:

These units are designed to create a full work space for either the patron or librarian. Grommet holes can be cut into the work surface and wire management bins can be added to accommodate computers (must be specified). Work surfaces are constructed from 1/4" thick, 45 lb. density industrial grade particle board covered with a neutral non-glare horizontal grade .050" thick high-pressure laminate on the top surface with .024" thick phenolic resign backer on the bottom surface. Edge treatments are 3/8" thick, solid hardwood, FAS select and better, that is kiln dried to a moisture content of less than 7%.

Cord Management:

Cord bin cover measures 5" deep and 29 1/2" long and is constructed from the same material as the work surface. An extra large cord management tray is constructed using 18-gauge steel and measures 5" high x 5" deep x 34 7/8" wide. Cord management bins are ordered separately. 36" wide units come with one bin while 72" wide units come with two.

Attachments:

Structural attachments are metal to metal connections with pre-threaded metal inserts and 14-gauge steel brackets. Where brackets can be seen, they are covered with hardwood solids.

Book Returns:

One for 36" wide units, or two for 72" wide units. 18" wide x 4" high slots are cut into the front panel.

Depressible Booktruck:

The Depressible Booktruck has a metal frame constructed from 1" square, 18-gauge steel tubing. The panels are constructed from 20-gauge steel. The bookdrop platform is a 1" thick, three-ply material with high pressure laminate. Booktruck works perfectly under the book return.

Transaction Counters:

Transaction counter measures a full 10" deep. Underneath the patron transaction counter is a work surface that is 29" high, and a full 29" deep. Top-accessible, built in wire management system come standard with these units.

Trapezoid Units:

Trapezoid Units create a corner unit for circulation desk. The trapezoid unit is also available with a transaction counter.

Dimensions: 36"W at ends and 29"W at middle. 75 3/4"L at outside and 26"L at inside.

LIBRARIANS' DESKS

Upright Panels, Work Surfaces, Cord Management and Attachments are the same as Circulation Desks.

Front Panels:

Each panel is constructed of 1" thick, 45 lb. density industrial grade particle board covered on both sides with A-grade plain sliced and book matched wood veneer. A 3/4" high neutral non-glare brushed toe kick is inset into the bottom of the front panel. All front panels are recessed 5" underneath work surfaces.

Overall Desk Dimensions: 73"W x 36"D x 29"H

INFORMATION STATIONS

Work Surfaces, Cord Management, Front Panels and Attachments are the same as Circulation Desks.

Upright Panels:

Same as Librarian's Desk except each is angled 32" to 29" high for children and 39" to 29" high for adults.

Transaction Counter:

Transaction Counter measures 10" deep. Underneath the patron transaction counter, a full 29" deep work surface is positioned at 29" high.

ACCESSORIES

Drawers:

Pencil, two and three drawer files are faced with a 3/4" thick matching vertical veneer front panel that has a 3mm hardwood edge. The file drawers use 100 lb. full extension Accuride® glides. Two and three drawer files are gang lockable. Drawers are suspended from the underside of the work surfaces.

Pencil Drawer Overall Dimensions:

17 7/8"W x 13 1/2"D x 3"H **Inside Dimensions:** 14 1/2"W x 12 11/16"D x 2 5/16"H

Shelves and Doors:

Shelves or doors can be added to a 36" wide unit. Constructed of 3/4" thick, 45 lb. density, industrial grade particle board covered on both sides with A-grade plain sliced and book matched wood veneer.

Keyboard Drawers:

There are two styles of keyboard drawers to choose from. One is constructed of steel and comes either with or without a mouse pad holder. Finished in powder paint.

Dimensions: 23 3/4"W x 12 1/2"D x 1 1/2"H

The second keyboard drawer is constructed of steel and particle board. Features a pneumatic control for raising or lowering the drawer. Comes with or without a mouse pad holder. Finished in black.

Surge Protected Power Strip:

Four-outlet surge protected power strip has one circuit capability and is equipped with a 20' electrical cord. Unit has an on/off switch for single-switch control. UL Listed.

CPU Holder:

Unit attaches to the upright panel. Accommodates up to 10"W CPUs. Finished in durable powder paint.

Dimensions: 17"W x 10"D x 10"H

DISPLAY FURNITURE

Bretford offers a wide variety of technical and display furniture for special areas of your library.

- Big Book Storage Unit stores oversized books on eight pull-out shelves.
- Big Book Easel allows you to display a particular book - fits perfectly on the Big Book Storage Unit for highlighting books.
- Dictionary Stand features a slant top ideal for utilizing reference materials.
- Atlas Case has enough room to store a variety of atlases on five pull-out shelves.

SPECIFICATION INFORMATION

DISPLAY FURNITURE

Octagon Display Unit:

All wood components are 1" thick, 45 lb. density particleboard covered on one side with .031" thick A grade plain sliced and book matched wood finish and the other side with backer. All worksurfaces and shelves are constructed of the same material however finished on one side with high-pressure laminate and the other side with backer. Edge treatments for the upright panels and top shall be constructed using 3/8" thick, solid hardwood, FAS select or better, with a 3/8" radius bullnose. All hardwood pieces shall be kiln dried to a moisture content of less than 7%. A 2-1/2"H solid wood FAS select or better toe kick plate shall conceal glides. On the base of the unit, four of the eight sides shall be slat-wall with wood veneer slats. The slat wall sections shall measure 18"W x 23-5/8"H. Four sides shall feature 2 shelves, one of which is adjustable. The shelves shall measure 18-1/2"W x 11-1/2"D x 1"H. Shelves adjust on 32mm centers. The base unit shall measure 28-1/2"H. The Top Shelf shall measure 28-1/4"W x 26-1/16"D x 11"H.

Dimensions: 51"W x 49"D x 39 1/2"H in

Big Book Storage Unit:

The Big Book Storage Unit comes with eight pull-out steel shelves, 22 1/4" wide x 23" deep x 3" high, constructed from 20-gauge steel. Each shelf has 3/8" clearance and 4 1/2" clearance between the unit top and the top shelf. All steel components are painted using an environmentally safe powder coat process. The side panels are constructed of industrial grade, 1" thick, 45 lb. density particle board covered on both sides with A-grade plain sliced and book matched wood veneer. Edge treatments for the upright panels and top are constructed using 3/8" thick, solid hardwood, FAS select or better, with a 3/8" radius bullnose. All hardwood pieces are kiln dried to a moisture content of less than 7%. The back panel and top are constructed with 1" thick, 45 lb. density industrial grade particle board and covered with .050" thick high pressure laminate. A 2 1/2" high solid wood toe kick plate conceals an 18-gauge steel base and four, 2" high swivel plate casters.

Dimensions: 26 1/2"W x 31 7/8"H x 23"D

Big Book Easel:

Big Book Easel comes complete with a 360 degree ball bearing swivel, which is attached to a 14-gauge steel 30 degree angled base. The easel surface is constructed of industrial grade 1" thick, 45 lb. density particle board covered on both sides with .050" thick high pressure laminate. Easel measures 22" wide x 15" high. The bottom support lip is a full 1 1/2" deep. Steel components are painted using a powder coat process.

Dimensions: 22"W x 14"H x 10 1/2"D

Dictionary Stand:

Legacy Dictionary Stand side panels and back are constructed of industrial grade 1" thick, 45 lb. density particle board covered on both sides with A-grade plain sliced and book matched wood veneer. Edge treatments for the upright panels and top are constructed using 3/8" thick, solid hardwood, FAS select or better, with a 3/8" radii corners front and back. All hardwood pieces are kiln dried to a moisture content of less than 7%. The book and top shelves are 1" thick, 45 lb. density industrial grade particle board covered with .050" thick high-pressure laminate.

Dimensions: 22"W x 43"H (back) and 37"H (front) x 16"D

Atlas Case:

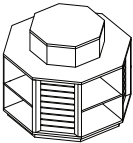

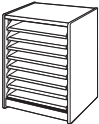

The Atlas Case comes complete with five pull out steel shelves, 25" wide x 23" deep x 3" high, constructed from 18-gauge steel. All steel components are painted using an environmentally safe powder coat process. Each shelf has 3/8" clearance and uses 100 lb. Accuride® full extension glides. The side panels and back are constructed of industrial grade 1" thick, 45 lb. density particle board covered on both sides with A-grade plain sliced and book matched wood veneer. Edge treatments for the upright panels and the top are constructed using 3/8" thick, solid hardwood, FAS select or better with a 9/16" corner radius. All hardwood pieces are kiln dried to a moisture content of less than 7%. The top is also constructed with 1" thick 45 lb. density industrial grade particle board and covered .050" thick high pressure laminate.

Dimensions: 28 1/2"W x 43"H x 26"D

TIP: Legacy Library furniture comes in a variety of paint finishes, laminates and veneers. See page 7 for options.

MOBILE UTILITY TRUCKS

Bretford Mobile Utility Trucks are the easiest way to move materials from one part of your library to another.

- Perfect for transporting books, reference materials, data processing information, DVDs and more.
- Wide variety of styles available to meet the needs of any library.
- Durable all-steel construction finished in smooth powder paint resists scratching and chipping.
- Wood Booktrucks add a touch of real wood elegance to your library and come in your choice of several beautiful wood finishes.
- Six-Wheel Booktrucks feature two additional wheels in the center to provide full rotation on a single point.
- The Browser Booktruck is a great way to feature or display items in a library.
- Depressible Booktruck protects books from damage when dropped through book drop.

SPECIFICATION INFORMATION

METAL BOOKTRUCKS

Metal Booktrucks come with panels and shelves which are constructed from 20-gauge steel. All steel components are painted using an environmentally safe powder coat process. The frame is constructed from 1" square, 18-gauge tubing. Distance between shelves measures 11½" except for the BOOV2, L330 and L327 which measure 12".

The following booktrucks feature a rounded handle and 4" twin-wheel casters, two with locking brakes.

BOOV2:

The BOOV2 comes with three slant shelves so that it may be placed against a wall. Shelves measure 35" wide x 9½" deep.

Dimensions: 36"W x 13"D x 42"H

BOOF1:

The BOOF1 comes with three flat shelves. Shelves measure 36" wide x 17⅞" deep. Available in nine color choices.

Dimensions: 37"W x 18"D x 42"H

BOOV1:

The BOOV1 comes with six slant shelves. Shelves measure 36" wide x 6¾" deep. Available in nine color choices.

Dimensions: 37"W x 18"D x 42"H

BOOV3:

The BOOV3 comes with six slant shelves. Shelves measure 36" wide x 6¾" deep. Features two additional 4" twin-wheel casters in center with locking brakes, which allows for easy maneuverability. Available in nine color choices.

Dimensions: 37"W x 18"D x 43"H

BOOV4:

The BOOV4 comes with four slant shelves and one flat shelf. Flat shelf is bottom shelf and measures 36" wide x 17" deep. Slant shelves measure 36" wide x 6¾" deep. Features two additional 4" twin-wheel casters in center with locking brakes, which allows for easy maneuverability. Available in nine color choices.

Dimensions: 37"W x 18"D x 43"H

TIP: Legacy Library furniture comes in a variety of paint finishes and veneers. See page 7 for options.

Browser Booktruck:

The Browser Booktruck offers four bins. Includes 8 moveable bin dividers so the bins can be divided into twelve compartments. Available in nine color choices. Bin size is 33"W x 17⅞"D x 6⅝"H.

Dimensions: 35"W x 18½"D x 31"H

The following booktrucks feature a square handle and 4" quiet-glide stem casters, two with locking brakes.

L330:

The L330 comes with three slant shelves so that it may be placed against a wall. Shelves measure 30" wide x 9½" deep.

Dimensions: 31"W x 13"D x 42"H

L327:

The L327 comes with three slant shelves so that it may be placed against a wall. Shelves measure 26" wide x 9½" deep.

Dimensions: 27"W x 13"D x 42"H

F336:

The F336 comes with three flat shelves. Shelves measure 36" wide x 16" deep. Available in nine color choices.

Dimensions: 37"W x 18"D x 42"H

VF336 and FV336:

Both models come with four slant shelves and one flat shelf. On the VF336, the flat shelf is the bottom shelf and on the FV336, the flat shelf is the top shelf. Flat shelves measure 36" wide x 17⅞" deep. Slanted shelves measure 36" wide x 6¾" deep. Available in nine color choices.

Dimensions: 37"W x 18"D x 42"H

V336:

The V336 comes with six slant shelves. Shelves measure 36" wide x 6¾" deep. Available in nine color choices.

Dimensions: 37"W x 18"D x 42"H

SWF336:

The SWF336 comes with three flat shelves. Shelves measure 36" wide x 17⅞" deep. Features two additional 5" plate casters in center. Available in nine color choices.

Dimensions: 37"W x 18"D x 43"H

SWVF336:

The SWVF336 comes with four slant shelves and one flat shelf. Flat shelf is bottom shelf and measures 36" wide x 17" deep. Slant shelves measure 36" wide x 6¾" deep. Features two additional 5" plate casters in center. Available in nine color choices.

Dimensions: 37"W x 18"D x 43"H

Browser Booktruck:

The Browser Booktruck offers four bins. Includes 14 moveable bin dividers so the bins can be divided into twelve compartments. Available in nine color choices. Bin size is 33"W x 17⅞"D x 6⅝"H.

Dimensions: 35"W x 18½"D x 31"H

Depressible Booktruck:

The Depressible Booktruck has a metal frame constructed from 1" square, 18-gauge steel tubing. The panels are constructed from 20-gauge steel. The bookdrop platform is a 1" thick, three-ply material with high pressure laminate. Inside dimensions are 28" wide x 23" deep. The 9" active coil spring depresses to allow 15½" of storage space. Comes with 4" casters, two locking, and bumper guards.

Dimensions: 30"W x 25"D x 30 ¼"H

WOOD BOOKTRUCKS

All Legacy Wood Booktrucks are constructed using 1" solid hardwood glued up veneer. The panels have a 17.5mm bullnose profile with radius corners. The 20-gauge steel shelves affix to the wood upright panels utilizing metal-to-metal, pre-threaded inserts and ¼" - 20 fastener. The 14-gauge steel base has welded steel caster sockets. Casters are quiet-glide, 4", two with locking brakes. Finished in durable powder paint.

WL330:

The WL330 comes with three slant shelves. Shelves measure 30" wide x 9½" deep. Distance between shelves measures 12¾".

Dimensions: 31"W x 13"D x 43½"H

WF336:

The WF336 comes with six slant shelves. Shelves measure 36" wide x 6¾" deep. Distance between shelves measures 11½".

Dimensions: 37"W x 18"D x 42"H
